CONTENTS

UNIT 1 - Probability Distributions - Elementary Ideas and Standard Models

FRAMES		PAGE
	DESCRIPTIVE METHODS	
1 - 2	Variates - Discrete and Continuous	2
3	The Use of Computers	3
4	Flow Diagrams	3
5 - 15	Tabular Representation of Data	4
16 - 20	Graphical Representation of Data	11
21 - 22	Arithmetical Description of a Distribution	14
23 - 27	Properties of the Arithmetic Mean	15
28 - 31	Calculation of the Mean from a Frequency Table	17
32	The Mode	19
33 - 37	The Median	19
38 - 52	Measures of Dispersion (or Spread or Variability)	23
53 - 56	Calculation of the Variance and Standard Deviation from a Frequency Table	30
57 - 73	Coding of Data	33
74	Quiz	38
75 - 76	Miscellaneous Examples and Answers	40
	PROBABILITY	
1	Introduction	46
2 - 8	The Classical (a priori) Approach	46
9 - 14	The Empirical Approach	49
15 - 18	The Use of Sets	53
19 - 24	Laws of Probability	54
25 - 28	The Addition of Probabilities	56
29 - 30	Multiplication of Probabilities - Independent Events	59
31 - 38	Conditional Probability	60
39	Summary	63
40 - 44	Use of $^{n}C_{r}$	63
45	Probability Tree Diagrams	66
46 - 59	Problem Solving	66
60 - 61	Miscellaneous Examples and Answers	73
APPENDIX A	Summary of terms and symbols in Set Theory	79
APPENDIX B	Combinations and the notation $^{n}C_{r}$	81
	PROBABILITY DISTRIBUTIONS FOR DISCRETE VARIATES (1)	
1 - 8	Probability Distributions	84
9 - 20	Bernoulli Trials and the Binomial Distribution	87
21 - 22	Mean and Variance of the Binomial Distribution	92
23 - 24	Distribution of Proportion of Successes	93

25 - 27	Fitting a Binomial Model	94
28 - 29	Miscellaneous Examples and Answers	95
APPENDIX	Mean and Variance of the Binomial Distribution	102

PROBABILITY DISTRIBUTIONS FOR DISCRETE VARIATES (2)

1 - 4	Introduction	103
5 - 10	From Binomial to Poisson	104
11 - 21	The Poisson Distribution	106
22 - 23	Fitting a Poisson model	110
24	The Poisson distribution as an approximation to the Binomial	112
25 - 26	Miscellaneous Examples and Answers	112

PROBABILITY DISTRIBUTIONS FOR CONTINUOUS VARIATES

1 - 5	Introduction	117
6 - 10	Probability Curves	119
11	Cumulative Distribution Function	122
12 - 14	Mean and Variance	122
15 - 21	The Exponential Distribution	123
22 - 28	The Normal (Gaussian) Distribution	127
29 - 30	The Standard Normal Distribution	130
31 - 40	Use of Tables	131
41	Use of Normal Probability Paper	136
42 - 45	Fitting a Normal Curve	138
46 - 47	The Normal Approximation to the Poisson Distribution	140
48	The Lognormal Distribution	141
49 - 56	Distribution of Sums and Differences	141
57 - 60	Variance of a General Function	146
61 - 62	Miscellaneous Examples and Answers	148
	UNIT 1 - Revision Examples and Answers	154

UNIT 2 - The Deduction of Information from Samples

CONFIDENCE LIMITS FOR THE MEAN

1 - 6	Sample and Population	164
7 - 24	Distribution of Sample Means	165
25	Summary	172
26 - 29	Confidence Limits for Population Mean - σ known	173
30 - 32	Sample Estimate of Population Variance	174
33 - 34	Degrees of Freedom	176
35 - 40	Confidence Limits for Population Mean - σ estimated	176
41 - 42	Relationship between t- and Normal Distributions	179
43 - 48	Confidence Limits for a Count	179
49	Quiz	181
50 - 51	Miscellaneous Examples and Answers	183

TESTS OF SIGNIFICANCE (1)

1 - 8	Introduction	188
9 - 18	Test of a Stated Value for a Population Mean - σ known	191
19 - 21	Test of a Stated Value for a Population Mean - σ estimated	195

22 - 26	t-Test applied to Paired Observations	196
27 - 34	Comparison of two Sample Means - σ known	199
35 - 39	Comparison of two Sample Means - σ estimated	202
40 - 43	Confidence Limits for Difference between Means	205
	Test of Difference between Proportions	
44 - 55	(i) Between an Observed Proportion and a Hypothetical One	206
56 - 58	(ii) Between two Observed Proportions	211
59 - 67	Type 1 and Type 2 Errors	212
68	Traditional v. Bayesian Approach	216
69	Which Test?	216
70 - 71	Miscellaneous Examples and Answers	217

TESTS OF SIGNIFICANCE (2)

1 - 7	One-tailed and Two-tailed Tests	226
8 - 14	The Variance Ratio F	229
15 - 18	One-tailed F-test	233
19 - 27	Two-tailed F-test	235
28 - 29	Confidence Limits for σ^2 using F	239
30 - 35	The Chi-squared Distribution	239
36	Use of Tables of χ^2	242
37 - 38	χ^2 and the Sampling Distribution of s^2	242
39	Confidence Limits for σ^2 using χ^2	243
40 - 59	χ^2 - tests for Goodness of Fit	243
60 - 70	Contingency Tables	253
71 - 73	The 2×2 Table	258
74	A Computer Example	260
75 - 76	Miscellaneous Examples and Answers	261

NONPARAMETRIC (DISTRIBUTION-FREE) TESTS

1	Introduction	270
2 - 7	Sign Tests	270
8 - 14	The Wilcoxon Signed Rank Test for matched pairs	273
15 - 27	The Mann-Whitney Test	276
28 - 30	Run Tests	282
31	Advantages and Disadvantages	284
32 - 33	Miscellaneous Examples and Answers	285

QUALITY CONTROL AND ACCEPTANCE SAMPLING

1	Introduction	288
2 - 15	Control Charts	288
16 - 19	Process Capability	295
20 - 24	Average Run Length	298
25 - 31	Cumulative Sum Charts	299
32 - 35	Decision Rule using a V-mask	302
36 - 51	Acceptance Sampling	305
52 - 53	Analogy with Hypothesis Testing	313
54 - 55	Miscellaneous Examples and Answers	314

UNIT 2 - Revision Examples and Answers 320

UNIT 3 - Variance Analysis, Correlation and Regression

ANALYSIS OF VARIANCE

1 - 35	Comparison of Several Means	333
36 - 38	Underlying Assumptions and Model	350
39 - 53	Extension to Two-way Classification	351
54	A Computer Program	360
55	Further Developments	362
56 - 57	Miscellaneous Examples and Answers	363

CORRELATION

1 - 3	Scatter Diagrams	368
4 - 11	The Correlation Coefficient	370
12 - 13	Alternative Formula for Calculating r	374
14 - 19	Bivariate Frequency Table	375
20 - 28	Interpreting a value of r	377
29 - 34	Rank Correlation	382
35 - 36	Miscellaneous Examples and Answers	384
APPENDIX	Derivation of the formula for Spearman's rank correlation coefficient	389

REGRESSION

1	Introduction	390
2 - 26	Regression Lines	390
27 - 29	Underlying Assumptions and Model	402
30 - 41	Analysis of Variance for Linear Regression	403
42 - 52	Confidence Intervals	409
53 - 59	Multiple and Curvilinear Regression	414
60 - 61	Miscellaneous Examples and Answers	419
APPENDIX	Sampling Distributions of b, a and $a + bx_0$	426
	UNIT 3 - Revision Examples and Answers	428
	BIBLIOGRAPHY	434
	TABLES	435
	INDEX	442
