Preface	ix
Acknowledgments	xi
1. Linear Regression Analysis	1
1.1 Introduction, 1	
1.2 Example, 2	
1.3 The Linear Regression Model, 3	
1.4 Estimating the Regression Coefficients, 5	
1.5 Testing the Significance of the Relationship, 6	
1.6 The Need for Alternative Methods, 6	
1.7 The Origin of the Word “Regression”, 8	
Notes, 10	
References, 11	
2. Constructing and Checking the Model	13
2.1 Introduction, 13	
2.2 Checking the Model, 14	
2.3 Modifying the Model, 15	
2.4 Examples, 16	
Notes, 24	
References, 27	
3. Least-Squares Regression	29
3.1 Introduction, 29	
3.2 An Example of Simple Regression, 29	
3.3 Estimating the Regression Line, 31	
3.4 Testing $\beta = 0$, 33	

3.5	Checking Normality, 37	
3.6	An Example of Multiple Regression, 38	
3.7	Estimating the Regression Coefficients, 38	
3.8	Testing the Regression Coefficients, 42	
3.9	Testing $\beta_{q+1} = \cdots = \beta_p = 0$, 45	
3.10	Testing $\beta_3 = 0$, 45	
3.11	The Coefficient of Determination, 47	
3.12	Computation, 47	
	Notes, 49	
	References, 54	
4.	Least-Absolute-Deviations Regression	57
4.1	Introduction, 57	
4.2	Estimating the Regression Line, 57	
4.3	Nonuniqueness and Degeneracy, 61	
4.4	Testing $\beta = 0$, 62	
4.5	An Example of Multiple Regression, 66	
4.6	Estimating the Regression Coefficients, 68	
4.7	Testing $\beta_{q+1} = \cdots = \beta_p = 0$, 76	
4.8	Computation, 78	
	Notes, 78	
	References, 83	
5.	M-Regression	85
5.1	Introduction, 85	
5.2	An Example of Simple Regression, 85	
5.3	Estimating the Regression Line, 87	
5.4	Testing $\beta = 0$, 90	
5.5	An Example of Multiple Regression, 91	
5.6	Estimating the Regression Coefficients, 93	
5.7	Testing $\beta_{q+1} = \cdots = \beta_p = 0$, 95	
5.8	Computation, 97	
	Notes, 99	
	References, 109	
6.	Nonparametric Regression	111
6.1	Introduction, 111	
6.2	An Example of Simple Regression, 111	
6.3	Estimating the Regression Line, 113	

6.4	Testing $\beta = 0$, 118	
6.5	An Example of Multiple Regression, 121	
6.6	Estimating the Regression Coefficients, 122	
6.7	Testing $\beta_{q+1} = \cdots = \beta_p = 0$, 126	
6.8	Computation, 130	
	Notes, 130	
	References, 140	
7.	Bayesian Regression	143
7.1	Introduction, 143	
7.2	The Bayesian Approach, 143	
7.3	An Example of Simple Regression, 144	
7.4	Estimating the Regression Line, 145	
7.5	Testing $\beta = 0$, 149	
7.6	An Example of Multiple Regression, 153	
7.7	Estimating the Regression Coefficients, 154	
7.8	Testing $\beta_{q+1} = \cdots = \beta_p = 0$, 157	
7.9	Computation, 160	
	Notes, 161	
	References, 170	
8.	Ridge Regression	173
8.1	Introduction, 173	
8.2	An Example of Simple Regression, 173	
8.3	Estimating the Regression Line, 173	
8.4	An Example of Multiple Regression, 176	
8.5	Standardization, 177	
8.6	Estimating the Regression Coefficients, 178	
8.7	Collinearity, 180	
	Notes, 183	
	References, 187	
9.	Comparisons	189
9.1	Introduction, 189	
9.2	Comparison of Properties, 189	
9.3	Comparisons on Three Data Sets, 196	
	Notes, 199	
	References, 203	

10. Other Methods	205
10.1 Introduction, 205	
10.2 Other Methods of Linear Regression, 205	
10.3 More General Methods of Regression, 209	
References, 212	
Appendix	215
Student's t -Distribution, 215	
F -Distribution, 216	
Chi-squared Distribution, 222	
Index	223
