

CONTENTS

1.	Introduction	1
2.	Application of step-stresses in accelerated life testing	1
2.1.	Problematics	1
2.2.	Some properties of the AFT model	4
2.3.	Estimation of the reliability function under normal stress using accelerated experiments	4
2.4.	Asymptotic properties of estimators	10
2.5.	Parametric estimation	16
2.6.	Estimation, when stresses change the shape of distribution	20
2.7.	Estimation in AFT model, when G is completely unknown and r is parametrized	21
3.	A goodness-of-fit test for the generalized Sedyakin's model	23
3.1.	Definitions	23
3.2.	Goodness-of-fit test. Complete data	24
3.3.	Type I censored data	29
4.	Accelerated life testing, when a process of production is unstable ...	30
4.1.	The heredity hypothesis	30
4.2.	Estimation of ρ and b	33
4.3.	Asymptotic properties of the estimators $\hat{\rho}$ and \hat{b}	35
4.4.	Test for the heredity principle	38
5.	Tests for equality of distributions of multicomponent systems	39
5.1.	Problematics	39
5.2.	The tests (bivariate case)	40
5.3.	Choice of optimal weights maximizing the power of tests under close alternatives	45
5.4.	Multivariate case	49
6.	Estimation and asymptotic properties of estimators in the generalized additive-multiplicative semiparametric model	49
6.1.	Generalized additive-multiplicative model	50
6.2.	Estimation of the regression parameters and the survival functions in the generalized additive-multiplicative model	53
6.3.	Asymptotic properties of the estimators	57

7.	Analysis of survival data with random covariates.....	71
7.1.	Estimation in the generalized multiplicative model.....	71
7.2.	Asymptotic properties of the estimators	72
7.3.	Estimation in the generalized additive semiparametric model	83
7.3.1.	Notations.....	83
7.3.2.	Estimating equation and estimators \tilde{H}_0 , $\hat{\gamma}$ and $\hat{S}_{\mathbf{x}(\cdot)}$..	84
7.3.3.	Asymptotic properties of the estimating function	85
7.3.4.	Asymptotic properties of the estimator $\hat{\gamma}$	91
7.3.5.	Asymptotic properties of \tilde{H}_0 and $\hat{S}_{\mathbf{x}(\cdot)}$	93
8.	Multivariate regression models in survival analysis	95
8.1.	Notion of Archimedian copula.....	95
8.2.	Characterization of the GM model	97
8.3.	Bivariate regression models	98
8.4.	Semiparametric estimation in bivariate regression models ...	99
8.5.	Some remarks on the multivariate case	103
9.	References	105
