

CONTENTS

1. Introduction	1
2. Definition of the transfer functional	2
3. Accelerated life models, when stresses are time dependent	4
3.1. Definitions	4
3.2. Some useful relations between the models 1-5	9
3.3. Submodels of the models 2 and 3, when G is specified	13
4. Accelerated life models, when the stress is constant	15
5. Accelerated life models, when the stress is piecewise constant or progressive	21
5.1. Piecewise constant stress	21
5.2. Progressive stress	27
6. Some remarks on parametrization of the functions r and a	27
7. Estimation in the models 2 and 3	31
7.1. Some remarks on types of data	31
7.2. Estimation under independent censoring	31
7.2.1. Model 2	32
7.2.2. Model 3	36
7.3. Grouped data	38
7.4. Type I and type II censored data	40
8. Some remarks on properties of the estimates	42
9. Tests for the models 1 and 2	44
9.1. Model 1	44
9.2. Model 2 and 3	48
9.3. Model 5	50
10. Multivariate models	52
10.1. Accelerated life models for systems of two components	52
10.2. Accelerated life models for systems of m components	60
10.3. Estimation (bivariate case)	63
10.4. Estimation (multivariate case)	66
