

CONTENTS

Foreword to the English Edition	ix
Preface	xi
Chapter I. Elements of the Theory of Point Statistical Estimation	1
1. The Problem of Point Statistical Estimation	1
2. Risk of a Statistical Estimator	9
3. Consistency	13
4. Unbiasedness	19
5. Examples	30
6. Order Statistics	43
7. Empirical Distribution Function	53
8. Sufficient Statistics	59
9. The Information Inequality	77
10. The Rao–Blackwell–Kolmogorov Theorem	83
11. Maximum Likelihood Estimation	90
12. The Method of Moments	105
13. Equivariant Estimators	111
14. Techniques for Improving Estimators	116
15. Unbiasedness in the Mean, and Other Concepts of Unbiasedness	123
16. Some Problems of Unbiased Estimation for the Normal Distribution	133
Chapter II. Techniques for Constructing Unbiased Estimators	145
1. Introducing a Factor Deleting the Bias	145
2. The Rao–Blackwell–Kolmogorov Method	147
3. Estimators Based on the Unbiased Probability Density Function Estimator	159
4. Techniques Based on the Equation of Unbiasedness	167
5. Unbiased Estimators of Parameters of Discrete Distributions	204
6. The Abbey and David Techniques	235
Chapter III. Applications of Unbiased Estimation Theory	247
1. Unbiased Estimators of Parameters of Truncated Exponential and Normal Distributions, with Applications	247

2.	Some Statistical Models and Estimators Useful in Integrated Circuit Quality Control	268
3.	Unbiased Estimators in the Classical Occupancy Problem with Applications	280
4.	Some Unbiased Estimators of the Reliability of Systems	290
5.	Unbiasedness, Sufficiency, and a Chi-Square Goodness-of-Fit Test for Discrete Exponential Distributions of Rank One	296
	Appendix	305
	Tables of Unbiased Estimators	305
A1.	Unbiased Estimators of Functions of Parameters of the Normal Distribution	306
A2.	Unbiased Estimators of Functions of the Parameter θ of the Uniform Distribution	340
A3.	Unbiased Estimators of the Functions of the Parameter θ of the Discrete Uniform Distribution (Sampling with Replacement)	347
A4.	Unbiased Estimators of Functions of the Parameter θ of the Discrete Uniform Distribution (Sampling without Replacement)	349
A5.	Unbiased Estimators of Functions of the Parameter θ of the Gamma-Distribution	350
A6.	Unbiased Estimators of Functions of Parameters μ and λ of the Inverse Gaussian Distribution	368
A7.	Unbiased Estimators of Functions of Parameters of the Weibull Distribution	382
A8.	Unbiased Estimators of Functions of Parameters of the Rayleigh Distribution	388
A9.	Unbiased Estimators of Functions of Parameters of some Independent Normal Distributions	393
A10.	Unbiased Estimators of Functions of a Parameter of the Seminormal Distribution	400
A11.	Unbiased Estimators of Functions of Parameters of the Left-Truncated Exponential Distribution (μ and σ are Unknown)	405
A12.	Unbiased Estimators of Functions of Parameters of the Left-Truncated Exponential Distribution (σ is Known)	410
A13.	Unbiased Estimators of Functions of Parameters of the Paretian Law	413
A14.	Unbiased Estimators of Functions of Parameters of the Left-Truncated Exponential Distribution of a General Type	424

A15. Unbiased Estimators of Functions of a Parameter of the Right-Truncated Exponential Distributions	426
A16. Unbiased Estimators of Functions of Parameters of the Uniform Distribution with Two Unknown Parameters	430
A17. Unbiased Estimators for Functions of a Parameter θ of the Extreme Value Distribution	433
A18. Unbiased Estimators of Functions of Parameters of the Burr Distribution	435
A19. Unbiased Estimators of Functions of Parameters of the Logarithmic-Power Distribution	437
A20. Unbiased Estimators for Functions of Parameters θ and r of the Left-Truncated Power Series Distribution	439
A21. Unbiased Estimators of Functions of Parameters θ and r of the Left-Truncated Generalized Logarithmic Series Distribution	443
A22. Unbiased Estimators of Functions of Parameters θ and r of the Left-Truncated Logarithmic Series Distribution	447
A23. Unbiased Estimators of Functions of Parameters of the Truncated Geometrical Distribution	450
A24. Unbiased Estimators of Functions of a Parameter θ of the Binomial Distribution	457
A25. Unbiased Estimators of Functions of a Parameter θ of the Negative Binomial Distribution	461
A26. Unbiased Estimators of Functions of Parameters of the Left-Truncated Generalized Negative Binomial Distribution	464
A27. Unbiased Estimators of Functions of Parameters of the Left-Truncated Generalized Poisson and the Borel-Tanner Distribution	470
A28. Unbiased Estimators of Functions of the Parameter θ of the Poisson Distribution	474
A29. Unbiased Estimators of Functions of Parameters of the Left-Truncated Poisson Distribution	479
A30. Unbiased Estimators of Functions of the Parameter θ of the Hypergeometric Distribution	484
A31. Unbiased Estimators of Functions of the Parameter θ of the Negative Hypergeometric Distribution	485
A32. Unbiased Estimators of Functions of Parameters of the Lognormal Distribution	486
A33. UMVUE's of Parameters for a Subclass of Stable Distributions	492
A34. UMVUE's of Parameters for the Stirling Distribution of the Second Kind	493
References	497
Subject Index	519
