

# Contents

Notations and Abbreviations . . . . .	8
Preface. . . . .	10
Chapter 1. The algorithms of Gauss, Borchardt and Carlson. . . . .	13
Chapter 2. Orders of magnitude and rates of convergence . . . . .	24
Chapter 3. Recurrence relations for powers . . . . .	33
Chapter 4. The solution of equations . . . . .	46
Chapter 5. Uniform convergence and approximation . . . . .	55
Chapter 6. The acceleration processes of Aitken and Euler . . . . .	66
Chapter 7. Asymptotic series . . . . .	73
Chapter 8. Interpolation . . . . .	84
Chapter 9. Quadrature . . . . .	98
Chapter 10. Difference equations, differentiation and differential equations . . . . .	118
Appendix: Bessel functions . . . . .	141
Solutions to Selected Problems . . . . .	160
Bibliographical Remarks . . . . .	247
Table of Contents, Vol. 2 Numerical Algebra . . . . .	250
Index . . . . .	251
