Preface xv

PART ONE THEORY

1. Linear Algebra I	1.1
1.1 Systems of Linear Algebraic Equations	1.1
1.2 Matrices	1.2
1.3 Determinants and the Inverse Matrix	1.5
1.4 Direct Methods	1.8
1.5 Error Analysis	1.13
1.6 Overdetermined System of Equations	1.20
1.7 Iterative Methods	1.21
2. Interpolation, Approximation, and Numerical Differentiation	2.1
2.1 Interpolation Techniques	2.1
2.2 Lagrange Interpolation	2.3
2.3 Newton Interpolation	2.5
2.4 Hermite Interpolation	2.8
2.5 Cubic-Spline Interpolation	2.10
2.6 Trigonometric Interpolation	2.14
2.7 Inverse Interpolation	2.15
2.8 Least-Squares Techniques	2.15
2.9 Approximation by Chebyshev Polynomials	2.17
2.10 Approximation by Orthogonal Polynomials with Arbitrarily Distributed Abscissas	2.19
2.11 Approximation of a Periodic Function	2.21

2.12	Economization of a Power Series	2.23
2.13	Approximation by a Rational Function	2.24
2.14	Numerical Differentiation	2.27
2.15	Choosing the Method	2.30
3.	Evaluation of Definite Integrals	3.1
3.1	Methods of Numerical Integration	3.1
3.2	Integrals with Numerically Defined Integrands	3.4
3.3	Integrals over Finite Intervals	3.5
3.4	Integrals over Semi-Infinite Intervals	3.6
3.5	Integrals over Infinite Intervals	3.7
3.6	Romberg Integration	3.8
3.7	Singular Integrals	3.10
4.	Ordinary Differential Equations	4.1
4.1	Definitions and Analytical Methods of Integration	4.1
4.2	Differential Equations Defining Special Functions	4.12
4.3	Euler and Taylor-Series Methods	4.16
4.4	Runge-Kutta Methods	4.20
4.5	Predictor-Corrector Methods	4.24
4.6	Stability and Accuracy of Integration Methods	4.31
4.7	Choosing the Method	4.32
5.	Boundary-Value Problems of Ordinary Differential Equations	5.1
5.1	Analytical Approach to Boundary-Value Problems	5.1
5.2	Orthogonal Eigenfunctions Defined as Solutions of a Boundary-Value Problem	5.6
5.3	Numerical Approach to Boundary-Value Problems	5.11
6.	Nonlinear Equations	6.1
6.1	Direct Methods for Algebraic Equations	6.1
6.2	Iterative Methods	6.5
6.3	Real Roots of Algebraic and Transcendental Equations	6.9
6.4	Complex Roots of Algebraic Equations	6.11
6.5	Analysis of Errors in Roots of Algebraic Equations	6.12
6.6	Real Roots of a System of Nonlinear Equations	6.13
7.	Linear Algebra II	7.1
7.1	Algebraic Eigenvalue Problem	7.1
7.2	Numerical Computation of the Eigenvalues of a Real Matrix	7.3
7.3	Eigenvectors	7.5
8.	Special Functions	8.1
8.1	The Polynomial Function	8.1
8.2	Orthogonal Polynomials	8.2
8.3	Hypergeometric Series and Confluent Hypergeometric Functions	8.3
8.4	Incomplete Elliptic Integrals of the First, Second, and Third Kind	8.5

8.5	The Bessel Function $J_n(x)$ and Modified Bessel Function $I_n(x)$ of Integer Order	8.6
8.6	The Bessel Function $J_\nu(x)$ of Order $\nu > -\frac{1}{2}$	8.6
8.7	The Bessel Function $Y_\nu(x)$ of Order $\nu > -\frac{1}{2}$	8.7
8.8	The Modified Bessel Function $K_\nu(x)$	8.7
8.9	The Spherical Bessel Functions $j_n(x)$ and $y_n(x)$	8.7
8.10	The Gamma Function of a Real Argument	8.8
8.11	The Gamma Function $\Gamma(\frac{1}{2} + n)$ for $n = 0, \pm 1, \pm 2, \dots$	8.9
8.12	The Incomplete Gamma Function	8.9
8.13	The Beta Function	8.9
8.14	The Error Function	8.10
8.15	The Fresnel Integrals $C(x)$ and $S(x)$	8.11
8.16	The Sine Integral and Cosine Integral	8.11
8.17	The Exponential Integral and Logarithmic Integral	8.12
8.18	The Gudermannian and Its Inverse	8.13
9.	Selected Problems of Mathematical Statistics	9.1
9.1	Elements of Combinatorial Analysis	9.1
9.2	Basic Concepts of Mathematical Statistics	9.2
9.3	Curve Fitting	9.5
9.4	Binomial and Negative Binomial Distribution	9.9
9.5	Hypergeometric Distribution	9.10
9.6	Poisson Distribution	9.11
9.7	Normal Distribution and Inverse Normal Distribution	9.11
9.8	Chi-Square Distribution	9.13
9.9	t Distribution	9.14
9.10	F Distribution	9.14
	References	R.1
PART TWO PROGRAMS IN BASIC		P.1
Using the Programs		P.3
1.	Linear Algebra I	P.7
P101	Condition Indicator for a System of Linear Algebraic Equations	P.7
P102	Solution of a System of Linear Algebraic Equations by the Doolittle Method with Partial Pivoting and/or Computation of the Determinant	P.11
P103	Solution of a Tridiagonal System of Linear Algebraic Equations	P.17
P104	Solution of a Pentadiagonal System of Linear Algebraic Equations	P.21
P105	Reduction of an Overdetermined System of Linear Algebraic Equations to a Determined System of Normal Equations	P.25
P106	Iterative Methods for a System of Linear Algebraic Equations: Jacobi, Gauss-Seidel, and Successive-Overrelaxation Methods	P.27
2.	Interpolation, Approximation, and Numerical Differentiation	P.31
P201	Lagrange Interpolation	P.31

P202	Lagrange Interpolation with Equally Spaced Abscissas	P.34
P203	Newton Interpolation for the Function and Its First and Second Derivatives	P.37
P204	Newton Interpolation with Equally Spaced Abscissas for the Function and Its First and Second Derivatives	P.41
P205	Hermite Interpolation for the Function and Its First and Second Derivatives	P.44
P206	Hermite Interpolation with Equally Spaced Abscissas for the Function and Its First and Second Derivatives	P.48
P207	Hermite Interpolation of a Function Defined at Two Points by the Function and Its First and Second Derivatives for the Function and Its First and Second Derivatives	P.52
P208	Cubic Spline for the Function and Its First and Second Derivatives	P.55
P209	Cubic Spline with Equally Spaced Abscissas for the Function and Its First and Second Derivatives	P.60
P210	Trigonometric Interpolation	P.65
P211	Least-Squares Approximation by Chebyshev Polynomials for the Function and Its First and Second Derivatives	P.68
P212	Least-Squares Approximation by Orthogonal Polynomials with Arbitrarily Spaced Abscissas and a Given Weight Function for the Function and Its First and Second Derivatives	P.73
P213	Least-Squares Approximation by Orthogonal Polynomials with Arbitrarily Spaced Abscissas and a Weight Function Equal to 1 for the Function and Its First and Second Derivatives	P.79
P214	Least-Squares Approximation by Orthogonal Polynomials with Equally Spaced Abscissas and a Given Weight Function for the Function and Its First and Second Derivatives	P.84
P215	Least-Squares Approximation by Orthogonal Polynomials with Equally Spaced Abscissas and a Weight Function Equal to 1 for the Function and Its First and Second Derivatives	P.90
P216	Least-Squares Approximation of a Periodic Function (Fourier Series) for the Function and Its First and Second Derivatives	P.95
P217	Least-Squares Approximation of an Even Periodic Function (Fourier Series) for the Function and Its First and Second Derivatives	P.100
P218	Least-Squares Approximation of an Odd Periodic Function (Fourier Series) for the Function and Its First and Second Derivatives	P.104
P219	Economization of a Power Series	P.108
P220	Padé Approximation of a Truncated Series with 8 Terms for the Function and Its First and Second Derivatives	P.111
P221	Modified Padé Approximation of a Truncated Series with 13 Terms for the Function and Its First and Second Derivatives	P.114
P222	Least-Squares Approximation by a Rational Function with Chebyshev Polynomials for the Function and Its First and Second Derivatives	P.118
P223	Numerical Differentiation: First and Second Derivatives of a Function Defined by 3, 5, or 7 Points with Equally Spaced Abscissas	P.124
3.	Evaluation of Definite Integrals	P.128
P301	Integration of a Numerically Defined Integrand by Composite Simpson's Rule	P.128

P302	Integration of a Numerically Defined Integrand by Modified Composite Simpson's Rule	P.130
P303	Integration of a Numerically Defined Integrand with Equally Spaced Abscissas by Composite Corrected Trapezoidal Rule	P.132
P304	Integration of a Numerically Defined Integrand with Arbitrarily Spaced Abscissas by Composite Corrected Trapezoidal Rule	P.134
P305	Composite Gaussian Integration of an Integral over a Finite Interval	P.136
P306	Laguerre Integration of an Integral over a Semi-Infinite Interval	P.138
P307	Composite Gauss-Laguerre Integration of an Integral over a Semi-Infinite Interval	P.140
P308	Hermite Integration of an Integral over an Infinite Interval	P.143
P309	Composite Gauss-Laguerre Integration of an Integral over an Infinite Interval	P.144
P310	Romberg Integration	P.147
P311	Chebyshev-Gauss Integration of a Singular Integral	P.149
P312	Integration of an Integral with Logarithmic Singularity	P.150
4.	Ordinary Differential Equations	P.151
P401	Fourth-Order Taylor-Series Method for a Set of Differential Equations of First Order	P.151
P402	Fourth-Order Taylor-Series Method for a Set of Differential Equations of Second Order	P.156
P403	Fourth-Order Standard Runge-Kutta Method for a Set of Differential Equations of First Order	P.160
P404	Gill's Version of Fourth-Order Runge-Kutta Method for a Set of Differential Equations of First Order	P.164
P405	Third-Order Predictor-Corrector Method for a Set of Differential Equations of First Order	P.168
P406	Fourth-Order Predictor-Corrector Method for a Set of Differential Equations of First Order	P.173
P407	Fourth-Order Predictor-Corrector Method for a Set of Differential Equations of Second Order	P.178
5.	Boundary-Value Problems of Ordinary Differential Equations	P.183
P501	Lagrange Interpolation for Boundary-Value Problems of One Ordinary Differential Equation of Second Order	P.183
6.	Nonlinear Equations	P.186
P601	Roots of a Quadratic Equation	P.186
P602	Roots of a Cubic Equation	P.188
P603	Roots of a Biquadratic Equation	P.190
P604	Preliminary Location of Real Roots of a Nonlinear Equation	P.193
P605	Real Roots of a Nonlinear Equation (with Deflation Subroutine for an Algebraic Equation)	P.196
P606	Real and Complex Roots of an Algebraic Equation (with Deflation Subroutine)	P.201

P607	Real Roots of Two Nonlinear Equations by Fixed-Point Iteration	P.209
P608	Real Roots of Two Nonlinear Equations by the Newton or Modified Newton Method	P.211
7.	Linear Algebra II	P.213
P701	Preliminary Location of Eigenvalues by the Gershgorin Method	P.213
P702	Coefficients of a Secular Equation by the Krylov Method	P.216
P703	Real and Complex Eigenvalues of a Real Matrix from a Secular Equation	P.221
P704	Orthonormal Eigenvectors of a Real Matrix with Simple Real Eigenvalues	P.229
8.	Special Functions	P.235
P801	The Polynomial Function and Its First and Second Derivatives	P.235
P802	Orthogonal Polynomials of Legendre, Laguerre, Hermite, and Chebyshev of the First and Second Kind, Their First and Second Derivatives, and Zeros of Chebyshev Polynomials of the First Kind	P.238
P803	The Hypergeometric Series, Confluent Hypergeometric Function, Their First and Second Derivatives, the Exponential Integral and Logarithmic Integral	P.242
P804	Incomplete Elliptic Integrals of the First, Second, and Third Kind, Bessel Functions $J_n(x)$ and Modified Bessel Functions $I_n(x)$ of Integer Order, the Incomplete Gamma Function, the Error Function, Fresnel Integrals $C(x)$, $S(x)$, and Sine and Cosine Integrals in Single Precision	P.246
P805	Incomplete Elliptic Integrals of the First, Second, and Third Kind, Bessel Functions $J_n(x)$ and Modified Bessel Functions $I_n(x)$ of Integer Order, the Incomplete Gamma Function, the Error Function, Fresnel Integrals $C(x)$, $S(x)$, and Sine and Cosine Integrals in Double Precision	P.250
P806	Bessel Functions $J_\nu(x)$, $Y_\nu(x)$, $K_\nu(x)$ (ν Is Any Real Number $> -\frac{1}{2}$), and Spherical Bessel Functions $j_n(x)$, $y_n(x)$ (n Is Zero or Any Positive Integer) in Single Precision	P.256
P807	Bessel Functions $J_\nu(x)$, $Y_\nu(x)$, $K_\nu(x)$ (ν Is Any Real Number $> -\frac{1}{2}$), and Spherical Bessel Functions $j_n(x)$, $y_n(x)$ (n Is Zero or Any Positive Integer) in Double Precision	P.260
P808	Spherical Bessel Functions $j_n(x)$, $y_n(x)$ of Order $n = 0, \dots, 9$	P.267
P809	Gamma Function of a Real Argument	P.270
P810	Gamma Function of Argument $n + \frac{1}{2}$, n an Arbitrary Integer	P.272
P811	Beta Function	P.273
P812	Gudermannian, Its Inverse, and Hyperbolic Functions in Single Precision	P.275
9.	Selected Problems of Mathematical Statistics	P.277
P901	Permutations, Variations, and Combinations	P.277
P902	Arithmetic, Geometric, and Harmonic Mean Values, Variances S^2 , s^2 , Standard Deviations S , s , Standard Errors E , e for a Sample of n Data	P.280
P903	Arithmetic Mean Value, Variances S^2 , s^2 , Standard Deviations S , s , Standard Errors E , e for a Sample of Grouped Data	P.282

P904	Linear, Power, Exponential, and Logarithmic Curve Fit	P.284
P905	Binomial-Power Curve Fit	P.287
P906	Parabolic Curve Fit	P.289
P907	Binomial and Cumulative Binomial Distribution	P.291
P908	Negative Binomial and Cumulative Negative Binomial Distribution	P.293
P909	Hypergeometric and Cumulative Hypergeometric Distribution	P.295
P910	Poisson and Cumulative Poisson Distribution	P.297
P911	Normal Distribution, Chi-Square Distribution, t Distribution, F Distribution	P.298
P912	Inverse Normal Distribution	P.303
Appendix		P.304
PA1	Derived Elementary Functions in Single Precision	P.304
PA2	Elementary Functions in Double Precision	P.306
PA3	Subroutines for Programming in Double Precision	P.311
	Index follows Appendix	I.1
