

## CONTENTS

Foreword . . . . .	v
Preface . . . . .	ix
<b>PART 1: INVARIANCE THEORY OF PRIOR PROBABILITIES . . . . .</b>	<b>1</b>
1. Bayes' Theorem and Inverse Probability . . . . .	3
2. Distributions Admitting Sufficient Statistics . . . . .	15
3. Invariance Theory of Jeffreys . . . . .	24
4. Some Properties of Jeffreys' Invariants . . . . .	32
5. Invariants of Distributions Admitting Sufficient Statistics: 1. One Parameter . . . . .	45
6. Invariants of Distributions Admitting Sufficient Statistics: 2. Several Parameters . . . . .	57
7. Invariants of Distributions Admitting Sufficient Statistics: 3. The Range Depending on the Parameter . . . . .	73
8. Invariants of Distributions Admitting Sufficient Statistics: 4. An Alter- native System of Invariants . . . . .	87
References . . . . .	91
<b>PART 2: THE GENERAL FORMS OF DISTRIBUTIONS         ADMITTING SUFFICIENT STATISTICS FOR         PARAMETERS IN NONREGULAR CASES . . . . .</b>	<b>95</b>
1. Introduction . . . . .	98
2. Definitions, Notation, and Preliminary Results . . . . .	105
3. The Nonregular Case with a Single Sufficient Statistic for a Single Unknown Parameter . . . . .	126
4. Derivation of the General Form of Section 3.10, Assuming the General Form of Equation (2-3), $f(x; \theta) =$ $\exp[u(\theta)v(x) + A(x) + B(\theta)]$ , When $a \leq x \leq b$ , for the Regular Case . . . . .	164

5.	The Nonregular Case with a Single Parameter Admitting a Minimal Set of Jointly Sufficient Statistics . . . . .	165
6.	Derivation of the General Forms of Section 5, Assuming the General Form of Equation (2-4) when $a \leq x \leq b$ , for the Regular Case . . . . .	171
7.	The Nonregular Case with Two Parameters . . . . .	174
8.	The Nonregular Case Involving More than Two Parameters . . . . .	184
	Acknowledgments . . . . .	186
	References . . . . .	186
PART 3: LOCATION AND SCALE PARAMETERS, AND SUFFICIENT STATISTICS . . . . .		189
1.	Introduction . . . . .	194
2.	Definitions, Notation, and Preliminary Results . . . . .	198
3.	Location Parameter . . . . .	208
4.	Scale Parameter . . . . .	212
5.	Distributions Depending on Both Location and Scale Parameters . . . . .	217
6.	Location-Parameter Families of Distributions of the Regular Type Admitting a Single Sufficient Statistic for the Location Parameter . . . . .	226
7.	Scale-Parameter Families of Distributions of the Regular Type Admitting a Single Sufficient Statistic for the Scale Parameter . . . . .	234
8.	The Normal Family of Distributions as the Only Location Scale-Parameter Family of Distributions of the Regular Type Admitting a Minimal Pair of Jointly Sufficient Statistics for the Parameters of Location and Scale . . . . .	240
9.	Location-Parameter Families of Distributions of the Nonregular Type Admitting a Single Sufficient Statistic for the Location Parameter . . . . .	243
10.	Scale-Parameter Families of Distributions of the Nonregular Type Admitting a Single Sufficient Statistic for the Scale Parameter . . . . .	246

11. The Rectangular and the Exponential Families of Distributions as the Only Location Scale-Parameter Families of Distributions of the Nonregular Type Admitting a Minimal Pair of Jointly Sufficient Statistics for the Parameters of Location and Scale . . . . .	254
Acknowledgments . . . . .	261
References . . . . .	261
Appendix I . . . . .	263
Appendix II . . . . .	264
Author Index . . . . .	265
Subject Index . . . . .	267
