<i>List of figures</i>	xi
<i>List of tables</i>	xiii
<i>Acknowledgments</i>	xvi
<b>Prologue</b>	<b>1</b>
<b>PART I</b>	
<b>Box-office champions, chaotic dynamics and herding</b>	<b>7</b>
<b>1 The market for motion pictures: rank, revenue and survival</b>	<b>11</b>
1.1 <i>Introduction</i>	11
1.2 <i>The motion picture exhibition market</i>	12
1.3 <i>Evolutionary survival tournaments</i>	14
1.4 <i>The Variety data</i>	15
1.5 <i>The survival model</i>	18
1.6 <i>Empirical results</i>	19
1.7 <i>Conclusions</i>	26
<b>2 Bose–Einstein dynamics and adaptive contracting in the motion picture industry</b>	<b>28</b>
2.1 <i>Introduction</i>	28
2.2 <i>The mechanics of supply</i>	29
2.3 <i>Demand discovery and distributional dynamics</i>	32
2.4 <i>Empirical box-office revenue distributions</i>	37
2.5 <i>Explaining the industry</i>	44
2.6 <i>Conclusions</i>	46
<b>3 Quality evaluations and the breakdown of statistical herding in the dynamics of box-office revenue</b>	<b>48</b>
3.1 <i>Introduction</i>	48
3.2 <i>Information and demand dynamics</i>	49
3.3 <i>The model</i>	51

3.4	<i>Estimates</i>	52
3.5	<i>The stable Paretian model</i>	56
3.6	<i>Bifurcation at phase transitions</i>	57
3.7	<i>Discussion of results</i>	60
3.8	<i>Conclusions</i>	62
<b>PART II</b>		
<b>“Wild” uncertainty, tough decisions and false beliefs</b>		<b>65</b>
<b>4</b>	<b>Uncertainty in the movie industry: can star power reduce the terror of the box office?</b>	<b>71</b>
4.1	<i>Introduction</i>	71
4.2	<i>Related literature</i>	72
4.3	<i>Modeling star power</i>	73
4.4	<i>The movie data</i>	77
4.5	<i>Estimation results</i>	84
4.6	<i>Choosing among movie projects</i>	96
4.7	<i>Conclusions</i>	98
<b>5</b>	<b>Does Hollywood make too many R-rated movies?: risk, stochastic dominance and the illusion of expectation</b>	<b>99</b>
5.1	<i>Introduction</i>	99
5.2	<i>Motion picture production by ratings</i>	101
5.3	<i>Choosing among uncertain movie projects</i>	103
5.4	<i>Ranking by success rates</i>	108
5.5	<i>Ranking by stochastic dominance</i>	110
5.6	<i>Conclusions</i>	120
<b>6</b>	<b>Big budgets, big openings and legs: analysis of the blockbuster strategy</b>	<b>122</b>
6.1	<i>Introduction</i>	122
6.2	<i>The blockbuster and the information cascade</i>	123
6.3	<i>Movie industry data and summary statistics</i>	125
6.4	<i>A structural model of box-office outcomes</i>	129
6.5	<i>Conclusions</i>	137
<b>PART III</b>		
<b>Judges, lawyers and the movies</b>		<b>139</b>
<b>7</b>	<b>Motion picture antitrust: the <i>Paramount</i> cases revisited</b>	<b>143</b>
7.1	<i>The essential economics of motion pictures</i>	145
7.2	<i>The feature motion picture</i>	151

7.3	<i>Integration and licensing</i>	154
7.4	<i>The courts' analyses</i>	166
7.5	<i>Paramount's effects</i>	170
7.6	<i>Conclusions</i>	174
<b>8</b>	<b>Was the antitrust action that broke up the movie studios good for the movies?: evidence from the stock market</b>	<b>176</b>
8.1	<i>Introduction</i>	176
8.2	<i>The studio system</i>	178
8.3	<i>The Paramount litigation</i>	178
8.4	<i>Stock prices</i>	181
8.5	<i>The feasibility of a motion picture cartel</i>	186
8.6	<i>Winners and losers</i>	188
8.7	<i>Conclusions</i>	189
<b>9</b>	<b>Stochastic market structure: concentration measures and motion picture antitrust</b>	<b>190</b>
9.1	<i>Introduction</i>	190
9.2	<i>Market power: theory and policy</i>	191
9.3	<i>Concentration in United States v. Paramount Pictures</i>	193
9.4	<i>Instability of concentration and shares</i>	194
9.5	<i>Turnover of the leading firms</i>	200
9.6	<i>Standard models do not apply to motion pictures</i>	202
9.7	<i>The probability distribution of the HHI</i>	204
9.8	<i>Conclusions</i>	206
<b>PART IV</b>		
	<b>A business of extremes</b>	<b>207</b>
<b>10</b>	<b>Motion picture profit, the stable Paretian hypothesis and the curse of the superstar</b>	<b>211</b>
10.1	<i>Introduction</i>	211
10.2	<i>The stable hypothesis</i>	213
10.3	<i>Motion picture profit</i>	214
10.4	<i>The stable distribution</i>	216
10.5	<i>Stable estimation and diagnostics</i>	217
10.6	<i>Probability under the stable model</i>	219
10.7	<i>"Nobody knows"</i>	220
10.8	<i>Conditional stable analysis and superstars</i>	221
10.9	<i>Sample average and expected value</i>	223
10.10	<i>The curse of the superstar</i>	225
10.11	<i>Success breeds success</i>	226

10.12	<i>Cost momentum and the angel's nightmare</i>	227
10.13	<i>Stable distribution and contracting</i>	228
10.14	<i>Conclusions</i>	230
<b>11</b>	<b>Contracting with stars when “nobody knows anything”</b>	<b>231</b>
11.1	<i>Introduction</i>	231
11.2	<i>On becoming a superstar</i>	232
11.3	<i>Artists and kurtosis</i>	235
11.4	<i>Career expectations and opportunities</i>	238
11.5	<i>Luck or talent?</i>	239
11.6	<i>Competing for stars</i>	243
11.7	<i>Artist contracts</i>	245
11.8	<i>Pay when you do know</i>	246
11.9	<i>Director contracts</i>	251
11.10	<i>Conclusions</i>	254
<b>12</b>	<b>How extreme uncertainty shapes the movie business</b>	<b>255</b>
12.1	<i>Introduction</i>	255
12.2	<i>Complex systems</i>	256
12.3	<i>Universality</i>	258
12.4	<i>Deep order</i>	259
12.5	<i>Complexity and the stable Paretian distribution</i>	265
	<b>Epilogue: can you manage a business when “nobody knows anything”?</b>	<b>267</b>
	<i>Probabilities</i>	268
	<i>Inside and outside the studio</i>	268
	<i>Risk and decision bias</i>	269
	<i>Narrow framing and sure things</i>	270
	<i>Financing movies</i>	271
	<i>Causality and Kim Basinger</i>	273
	<i>A skeptical attitude</i>	275
	<i>Notes</i>	276
	<i>Bibliography</i>	298
	<i>Index</i>	305
