<i>Preface</i>	<i>page</i> ix
<i>Acknowledgements</i>	xiii
1 Introduction and motivation	1
1.1 The SM fine-tuning problem	3
1.2 Three quantitative indications	11
1.3 Theoretical considerations	12
2 Spinors: Weyl, Dirac and Majorana	16
2.1 Spinors and Lorentz transformations	18
2.2 Constructing invariants and 4-vectors out of 2-component (Weyl) spinors	21
2.3 A more streamlined notation for Weyl spinors	25
2.4 Dirac spinors using χ - (or L-) type spinors only	31
2.5 Majorana spinors	33
3 Introduction to supersymmetry and the MSSM	41
3.1 Simple supersymmetry	41
3.2 A first glance at the MSSM	47
4 The supersymmetry algebra and supermultiplets	50
4.1 One way of obtaining the SU(2) algebra	50
4.2 Supersymmetry generators ('charges') and their algebra	53
4.3 The supersymmetry current	58
4.4 Supermultiplets	61
4.5 A snag, and the need for a significant complication	65
5 The Wess–Zumino model	70
5.1 Interactions and the superpotential	70
5.2 Cancellation of quadratic divergences in the W–Z model	77
6 Superfields	88
6.1 SUSY transformations on fields	88
6.2 A differential operator representation of the SUSY generators	93

6.3	Chiral superfields, and their (chiral) component fields	95
6.4	Products of chiral superfields	97
6.5	A technical annexe: other forms of chiral superfield	100
7	Vector (or gauge) supermultiplets	106
7.1	The free Abelian gauge supermultiplet	106
7.2	Non-Abelian gauge supermultiplets	109
7.3	Combining chiral and gauge supermultiplets	112
8	The MSSM	120
8.1	Specification of the superpotential	120
8.2	The SM interactions in the MSSM	125
8.3	Gauge coupling unification in the MSSM	129
8.4	R -parity	135
9	SUSY breaking	137
9.1	Breaking SUSY spontaneously	137
9.2	Soft SUSY-breaking terms	144
9.3	RGE evolution of the parameters in the (softly broken) MSSM	149
10	The Higgs sector and electroweak symmetry breaking in the MSSM	154
10.1	The scalar potential and the conditions for electroweak symmetry breaking	154
10.2	The tree-level masses of the scalar Higgs states in the MSSM	158
10.3	The SM fine-tuning problem revisited, in the MSSM	164
10.4	Tree-level couplings of neutral Higgs bosons to SM particles	166
11	Sparticle masses in the MSSM	173
11.1	Gluinos	173
11.2	Neutralinos	174
11.3	Charginos	177
11.4	Squarks and sleptons	179
12	Some simple tree-level calculations in the MSSM	185
12.1	Sparticle decays	185
12.2	Sparticle production processes	195
12.3	Signatures and searches	208
12.4	Benchmarks for SUSY searches	210
