3 General Introduction

7 References

9 Chapter 1: A Macroeconomic Model for Monetary Policy

9 1.1. Introduction

10 1.2. Empirical Macroeconomics - How much structure do we need?

15 1.2.1. Empirical Evidence on the Macroeconomic Effects of Money

17 1.2.2. Monetary Policy Rules

18 1.2. The Model

19 1.2.1. The macroeconomy

21 1.2.2. The Central Bank

23 1.3. Empirical Results

24 1.3.1. The macroeconomic model

24 1.3.2. The monetary policy rule

26 1.3.3. Dynamic Effects of Monetary and Macroeconomic Shocks

29 1.4. Policy Analysis

29 1.4.1. Comparing Historical Policy Rules

31 1.4.2. Sunspots and Indeterminacy in Linear Rational Expectation Models

32 1.4.3. Optimal Policy

33 1.4.4. Asset-Pricing Implications

33 1.5. Conclusion

35 Appendix 1: Solving a dynamic forward-looking general equilibrium model for a backward-looking reduced form

40 Appendix 2: A simple example of a Neo-Keynesian model that fits the present framework

45 Appendix 3: Computing a macroeconomic term structure model

52 Chapter 2. Monetary policy Shocks - A Nonfundamental Look at the Data

52 2.1. Introduction
55 2.2. Conditional and Unconditional Moments
57 2.3. Vector Autoregressions and Nonfundamentalness
57 2.3.1. Traditional (fundamental) VAR analysis
59 2.3.2. Nonfundamental VAR analysis
62 2.3. The effect of money on output
72 2.4. Conclusion
73 Appendix: Invertibility, Fundamentalness and Blaschke matrices
77 References

81 Chapter 3. Macroeconomic Dynamics and the Effect of the Zero Lower Bound on Nominal Interest Rates
81 3.1. Introduction
82 3.2. Optimal Inflation and the Zero Lower Bound
82 3.2.1. Optimal Inflation
83 3.2.2. The Zero Lower Bound

85 3.2.2.1. Nonuniqueness of the steady state
87 3.2.2.2. Asymmetric impulse responses
88 3.2.3. The Relevance of the Zero Lower Bound
89 3.2.3.1. Historical analysis
90 3.2.3.2. Simulation analysis
91 3.3. A Small-scale Neo-Keynesian Model
91 3.3.1. Model specification
93 3.3.1. Model solution
94 3.4. The Probability of Hitting the Zero Bound
96 3.5. Conclusions
97 Appendix: Solving the model
