

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Preliminaries</b>	<b>5</b>
2.1	Mathematical Preliminaries . . . . .	5
2.1.1	Sets of Numbers . . . . .	5
2.1.2	Definitions of Basic Functions . . . . .	5
2.1.3	Basics of Probability Theory . . . . .	6
2.1.4	Notations Regarding Matrices and Vectors . . . . .	9
2.2	Real-Time Systems . . . . .	9
2.2.1	Definition of Real-Time Systems . . . . .	9
2.2.2	Characteristics, Requirements and Structure of Real-Time Systems . . . . .	9
2.2.3	Scheduling Aspects . . . . .	11
2.2.4	Multiprocessor and Distributed Real-Time Systems . . . . .	13
2.2.5	Scheduling Strategies for Real-Time Systems . . . . .	14
2.2.6	The Notion of Operation Modes . . . . .	17
2.3	Adaptive Resource Management . . . . .	18
2.3.1	Consideration of Quality of Service . . . . .	18
2.3.2	Resource Allocation Methods . . . . .	22
<b>3</b>	<b>System Model and Architecture</b>	<b>25</b>
3.1	The Scheduling Problem . . . . .	25
3.2	Extrinsic Parameters and Operation Modes . . . . .	25
3.3	Resource Allocation and Scheduling . . . . .	28
3.3.1	Allocating Tasks on Processors . . . . .	28
3.3.2	Introduction of Covering Modes . . . . .	32
3.3.3	Heuristics for Choosing Basic Modes . . . . .	35
3.3.4	The Allocation Table . . . . .	37
3.4	System Architecture . . . . .	37
3.5	Contribution of the Thesis . . . . .	39
3.5.1	Development of a Quality of Service Concept . . . . .	39
3.5.2	Strategies for Allocation Selection . . . . .	39

<b>4</b>	<b>Introduction of a Quality of Service Concept</b>	<b>41</b>
4.1	Service Parameters . . . . .	41
4.2	The Utility Function . . . . .	44
4.3	The Service Parameter Optimization Problem . . . . .	45
4.4	Extension of the Real-Time System . . . . .	46
4.5	The Quality of Service Optimizer . . . . .	46
4.6	Summary . . . . .	47
<b>5</b>	<b>Optimization of Quality of Service</b>	<b>49</b>
5.1	Simulated Annealing . . . . .	49
5.1.1	The Cooling Schedule . . . . .	51
5.1.2	The Halting Criterion . . . . .	51
5.2	Adaption to Service Parameter Optimization . . . . .	52
5.2.1	The Evaluation Function . . . . .	52
5.2.2	Representation of a Solution . . . . .	52
5.2.3	The Initial Solution . . . . .	52
5.2.4	The Neighborhood . . . . .	53
5.2.5	The Cooling Schedule . . . . .	53
5.2.6	The Halting Criteria . . . . .	53
5.3	Summary . . . . .	53
<b>6</b>	<b>Computation of Reallocation Cost</b>	<b>55</b>
6.1	Communication in Real-Time Systems . . . . .	56
6.1.1	Network Structure . . . . .	56
6.1.2	Communication Characteristics . . . . .	56
6.1.3	Media Access Strategies . . . . .	58
6.2	Modeling the Communication Process . . . . .	61
6.2.1	Calculating the Communication Duration . . . . .	64
6.3	The Mode Change Protocol . . . . .	68
6.3.1	The Mode Change Model . . . . .	68
6.3.2	Requirements of Mode Change Protocols . . . . .	69
6.3.3	Types of Mode Change Protocols . . . . .	70
6.3.4	Adaptation of a Mode Change Protocol . . . . .	71
6.4	Calculating the Reallocation Cost . . . . .	78
6.5	Discussion of the Reallocation Cost Concept . . . . .	80
6.6	Summary . . . . .	82
<b>7</b>	<b>Selecting Feasible Allocations</b>	<b>85</b>
7.1	Basic Definitions and Notations . . . . .	85
7.2	Evaluation of the Allocation Quality . . . . .	86

7.3	Randomly Changing Operation Modes . . . . .	87
7.3.1	Calculation of the Expected Value $\mu$ and the Standard Deviation $\sigma$ . . . . .	88
7.3.2	Number of Covered Realistic Modes . . . . .	88
7.3.3	Minimal Reallocation Cost as Selection Criterion . . . . .	89
7.3.4	Observing the Probability of Operation Mode Changes . . . . .	89
7.3.5	Position of the Current Mode in the Covered Mode Set . . . . .	90
7.4	Trends and Cycles in the Series of Operation Modes . . . . .	91
7.5	Detection and Prediction of Trends . . . . .	93
7.5.1	The Discrete Kalman Filter . . . . .	94
7.5.2	Advantages from the Kalman Filter Approach . . . . .	98
7.5.3	Adaptation of the Kalman Filter . . . . .	99
7.5.4	Allocation Decisions on Basis of Knowledge about Local Linear Trends . . . . .	100
7.6	Detection and Monitoring of Cycles . . . . .	100
7.6.1	Allocation Decisions on Basis of Knowledge about Cycles . . . . .	102
7.7	Combinations of Long-Term Movements . . . . .	102
7.8	Summary . . . . .	104
<b>8</b>	<b>Experimental Results</b>	<b>107</b>
8.1	Environment of the Simulation . . . . .	107
8.2	Results of the Service Parameter Optimizing . . . . .	108
8.3	Comparison of Measures for the Reallocation Cost . . . . .	109
8.4	Strategies for Randomly Changing Operation Modes . . . . .	110
8.4.1	Effect of the History Length $q_R^{hist}$ on the <i>PMC</i> and <i>MP</i> Strategy . . . . .	110
8.4.2	Comparison of Allocation Selection Strategies for Randomly Changing Operation Modes . . . . .	111
8.5	Strategies for Series of Operation Modes with Trends . . . . .	113
8.5.1	Influence of the Parameters on the Kalman Filter . . . . .	113
8.5.2	Comparison of Allocation Selection Strategies for Series of Operation Modes with Trends . . . . .	119
8.6	Strategies for Series of Operation Modes with Cycles . . . . .	120
8.7	Strategies for Combinations of Long-Term Movements . . . . .	121
8.8	Summary . . . . .	122
<b>9</b>	<b>Conclusions and Outlook</b>	<b>123</b>
	<b>Bibliography</b>	<b>125</b>
