

# CONTENTS

<i>Contributors</i>	v
<i>Preface</i>	ix
High Speed Inviscid Compressible Flow by the Finite Element Method <i>O. C. Zienkiewicz, R. Löhner and K. Morgan</i>	1
Finite Element Calculations of Parameters for Singularities in Problems of Fracture <i>J. R. Whiteman and G. M. Thompson</i>	27
New Solution Procedures for Linear and Non-Linear Finite Element Analysis <i>M. A. Crisfield</i>	49
Automatic Mesh Generation: A Finite Element/Computer Aided Geometric Design Interface <i>J. C. Cavendish, D. A. Field and W. H. Frey</i>	83
Finite Element Modelling in an Integrated Computer Aided Design Environment <i>M. S. Shephard</i>	97
A Method for Determination of Two-Dimensional Field Lines <i>E. -M. Salonen, R. Salminen and J. Aalto</i>	105
Finite Element on the D. A. P. <i>R. Wait and I. Martindale</i>	113
Design and Implementation of an Efficient Three-Dimensional Finite Element Code for High Temperature Problems <i>T. J. W. Ward and C. G. Burton</i>	123

Finite Element Modelling of Viscoelastic Material: Response of Polymeric Structures <i>D. Harrison, J. R. Whiteman and A. L. Yettram</i>	137
Finite Elements with Singular Shape Functions for Quadrilateral and Brick Elements <i>W. S. Blackburn</i>	149
The Final Shape of Acidized Channels in Chalk Formations After Fracture Closure <i>J. Nittmann</i>	157
An Assessment of Different Three-Dimensional Element Models in Linear Elastic Fracture Mechanics <i>T. K. Hellen</i>	167
Numerical Studies of Bifurcation and Pulse Evolution in Mathematical Biology <i>A. R. Mitchell and V. S. Manoranjan</i>	175
On Some Mathematical Aspects of Boundary Element Methods for Elliptic Problems <i>W. L. Wendland</i>	193
The Solution of Time Dependent Problems Using Boundary Elements <i>C. A. Brebbia</i>	229
A Boundary Element Method for Stokes Equations in 3-D Exterior Domains <i>F. K. Hebeker</i>	257
Creation of a Mass Matrix in Elastodynamics by the Boundary Element Method <i>D. Nardini and C. A. Brebbia</i>	265
Stress Analysis with a Combination of HSM and BEM <i>E. Schnack</i>	273
Infinite Elements for the Analysis of Unbounded Domain Problems <i>K. Moriya</i>	283
Combining Isoparametric and Hierarchical Element Procedures <i>J. E. Akin and R. J. Kipp</i>	291

On the Improvement of Numerical Accuracy of FEM-Solutions <i>N. -E. Wiberg, A. Samuelsson and L. Bernspång</i>	301
A General Finite Element Framework for Nodal Methods <i>J. P. Hennart</i>	309
Implementing Finite Element Methods on a Supercomputer <i>L. W. Spradley</i>	317
Error Bounds for the Approximation of the Stokes Problem Using Bilinear/Constant Elements on Irregular Quadrilateral Meshes <i>J. Pitkäranta and R. Stenberg</i>	325
Mixed Finite Element Approximation of a Fluid Flow Problem <i>R. Verfürth</i>	335
Petrov–Galerkin Methods and Diffusion–Convection Problems in 2D <i>K. W. Morton and B. W. Scotney</i>	343
Some Superconvergence Results for Mixed Finite Element Methods for Elliptic Problems on Rectangular Domains <i>M. Nakata, A. Weiser and Mary F. Wheeler</i>	367
On Optimization Aspects of a CFD Finite Element Penalty Algorithm <i>A. J. Baker</i>	391
Finite Elements for Nonlinear Integro-Differential Equations and Their Integration in Time <i>M. M. Sanz-Serna and I. Christie</i>	415
Moving Finite Element Methods for the Solution of Evolutionary Equations in One and Two Dimensions <i>A. J. Wathen, M. J. Baines and K. W. Morton</i>	421
On the Convergence of a Finite Element Method for Solving a Nonlinear Free Boundary Problem Related to MHD Equilibria <i>G. Caloz and J. Rappaz</i>	431
On the Norm of the Sobolev Imbedding of $H^2(G)$ into $C(G)$ for Square Domains in $\mathbb{R}^2$ <i>J. T. Marti</i>	441

Groups, Symmetry and Variational Boundary-Value Problems <i>A. Bossavit</i>	451
Numerical Problems in 3D Finite Element Analysis Based on Degenerated Elements <i>J. Altenbach, H. Berger and U. Gabbert</i>	459
Postbuckling and Imperfection Sensitivity of Elastic Structures <i>H. Beem, U. Eckstein, R. Harte, R. K. Jürcke, W. B. Krätzig and U. Wittek</i>	469
An Annular Finite Element in Polar Coordinates for Plate Bending Problems <i>A. B. Sabir and H. G. V. Der Avanesian</i>	481
On the Convergence of a Four-Node Plate Bending Element Based on Mindlin–Reissner Plate Theory and a Mixed Interpolation <i>K. J. Bathe and F. Brezzi</i>	491
Formulation and Finite Element Analysis of a General Class of Rolling Contact Problems with Finite Elastic Deformations <i>J. T. Oden, E. B. Becker, T. L. Lin and L. Demkowicz</i>	505
Indirect Optimization Algorithms for Nonlinear Contact Problems <i>D. Bischoff</i>	533
Nonconvex Unilateral Contact Problems and Approximation <i>P. D. Panagiotopoulos</i>	547
On Optimal Shape Design of an Elastic Body on a Rigid Foundation <i>J. Haslinger, P. Neittanmäki and T. Tiihonen</i>	555
Nodal Methods for the Transport Equation <i>P. Lesaint</i>	563
Least Squares Formulation of Extremum Principles and Weighted Residual Methods Used in Finite Element Codes for Solving the Boltzmann Equation for Neutron Transport <i>R. T. Ackroyd</i>	571
<i>A-Posteriori</i> Error Estimation, Adaptive Mesh Refinement and Multigrid Methods Using Hierarchical Finite Element Bases <i>A. W. Craig, J. Z. Zhu and O. C. Zienkiewicz</i>	587

Dynamic Implementation of the h-Version of the Finite Element Method	595
--	-----

*M. C. Rivara*

## Abstracts of Poster Sessions

1. A. Raster Scan Algorithm for Generating Hidden Isoparametric Surfaces	603
<i>J. E. Akin, J. M. Montgomery and W. H. Gray</i>	
2. Application of a Direct Elimination Procedure in the Boundary Element Analysis of Multi-Region Problems	603
<i>M. C. Au</i>	
3. A Fully Interactive Multigrid Finite Element Stress Package	604
<i>K. E. Barrett, D. N. Butterfield, S. Ellis and J. H. Tabor</i>	
4. Treatment of a Re-Entrant Vertex in a Three-Dimensional Poisson Problem	604
<i>A. E. Beagles and J. R. Whiteman</i>	
5. The Homogenization Method Applied to Free Surface Seepage in Layered Porous Media	605
<i>J. C. Bruch, Jr. and A. Shechter</i>	
6. A Simple Test Example for Error Bounds for the Finite Element Method	606
<i>L. Collatz</i>	
7. Body Oriented Coordinates Applied to the Finite-Element-Method	606
<i>W. A. Cook</i>	
8. Characteristic Impedance of Transmission Lines Using Dual Finite-Elements	607
<i>P. Daly</i>	
9. On Chebyshev Pseudospectral Calculations with Finite Element Reconditioning	607
<i>M. Deville and E. Mund</i>	
10. The Implementation of Finite Element Methods on the ICL DAP Parallel Processor	608
<i>P. G. Ducksbury</i>	

11. Optimal Interpolation Schemes for Quadrilateral Plate Bending Elements 609  
*S. Ellis, K. E. Barrett and J. H. Tabor*
12. Simulation of the Elastoplastic Indentation of a Sphere Against a Halfspace Using the Finite Element Methods 610  
*N. Endahl*
13. Finite Element Analysis of Singular Diffusion Equations 611  
*R. England and I. Rudomin*
14. A Finite Element Solution of the Three-Dimensional Neutron Transport Equation 611  
*J. K. Fletcher*
15. On the Convergence of Mixed Finite Element Methods for the Transient Response of the Timoshenko Beam 612  
*T. Geveci*
16. The NAG/SERC Finite Element Library 613  
*C. Greenough, C. R. I. Emson and I. M. Smith*
17. Galerkin or Collocation for Second Kind Integral Equations? 614  
*S. Joe*
18. Variational Inequalities in Plasticity—Dual Finite Element Approach 615  
*Z. Kestránek*
19. A Three-Dimensional Finite Element Analysis of Bulging during the Continuous Casting of Steel Slabs and Blooms 615  
*B. M. Leckenby, B. A. Lewis and B. Barber*
20. Superconvergent Recovery of the Gradient from Finite Element Approximations on Linear Triangles 616  
*N. Levine*
21. Different Finite Element Approximations for Reverse-Biased Semiconductor Devices 617  
*L. D. Marini*

22. Stability of Rotating Systems Using Nonlinear Finite Element Methods 617  
*H. G. Matthies and C. Nath*
23. The Application of Boundary Element Method to External Flow Problems 618  
*T. T. Mohamad*
24. SAFE — Stress Analysis Using Finite Elements 619  
*A. O. Moscardini, B. A. Lewis and M. Cross*
25. On the Quasi-Coupled Signorini Problem with Friction in Linear Thermo-Elasticity 619  
*J. Nedoma*
26. Application of Finite Element Method for Solution of Electroanalytical Problems 620  
*M. Penczek and Z. Sojek*
27. FELTRAN 621  
*C. S. Quad, J. Issa, A. J. H. Goddard and R. T. Ackroyd*
28. An Adaptive Finite Element Approach to a Plate Problem 622  
*E. Rank*
29. Accurate Two-Dimensional Finite Element Modelling of Charge Coupled Devices 623  
*M. Razaz*
30. A Finite Element Method for Solving a Packed Batch Distillation Problem 623  
*A. Said, L. Pibouleau and S. Domenech*
31. Spaces of Piecewise Polynomials in Two Variables 624  
*L. L. Schumaker*
32. Boundary Element Methods for Crack Problems in the Presence of Body Forces 624  
*R. N. L. Smith and J. C. Mason*
33. A Computational Study of Branching in Nonlinear Water Waves 625  
*E. F. Toro*

34. Theory and Practice of Efficient CAD-Implementations in Structural Analysis <i>Ch. Troeder, J. Böhm and A. Spielvogel</i>	625
35. Steady State Temperature Distribution in the Human Torso <i>E. H. Twizell and P. Smith</i>	626
<i>Index</i>	627
