

# ***LIST OF CONTENTS***

## **CHAPTER 1 ROOT SOLVING TECHNIQUES**

1.1	CONVENTIONAL METHODS .....	1
1.2	EXAMPLES TO ILLUSTRATE CONVENTIONAL METHODS ..	6
1.3	GENERAL FORMULATION OF THE NEW ALGORITHM ....	8
1.4	PROCEDURE FOR FINDING ROOTS .....	10
1.5	STABILITY OF ALGORITHM .....	12

## **CHAPTER 2 FINDING THE ROOTS OF AN EQUATION**

2.1	USING A CALCULATOR TO FIND A ROOT .....	18
2.2	SIMPLIFIED TABULATION PROCEDURE .....	20
2.3	COMPUTER METHOD FOR FINDING ROOTS .....	21
2.4	EXAMPLE OF EVALUATING ROOTS AND SINGULARITIES ..	28
2.5	SPECIAL CASES? .....	33

## **CHAPTER 3 SOLVING SIMULTANEOUS EQUATIONS**

3.1	USING A CALCULATOR TO SOLVE SIMULTANEOUS EQUATIONS .....	36
3.2	COMPUTER METHOD FOR SOLVING SIMULTANEOUS EQUATIONS .....	37
3.3	SIGN COMBINATION AND EQUATION SEQUENCE SUBROUTINES .....	41
3.4	SOLVING COMPLEX AND UNRELATED EQUATIONS ....	48

## CHAPTER 4 SOLVING PRACTICAL PROBLEMS

4.1	VARIATION OF VAPOUR PRESSURE WITH TEMPERATURE ...	52
4.2	TUNING SHARPNESS OF A RESONANT CIRCUIT .....	54
4.3	DIPOLE FIELD STRENGTH .....	59
4.4	DISCOUNTED CASH FLOW .....	64
4.5	DIRECT CURRENT NETWORK .....	68
4.6	SIMULTANEOUS COMPLEX EQUATIONS .....	71

## CHAPTER 5 TURNING POINTS

5.1	FINDING THE TURNING POINTS OF FUNCTIONS .....	75
5.2	MULTI-DIMENSIONAL TURNING POINTS .....	82
5.3	TURNING POINTS OF SURFACES .....	84
5.4	TURNING POINTS WITH CONSTRAINTS .....	89

## CHAPTER 6 DATA FITTING

6.1	INTERPOLATING POLYNOMIALS .....	95
6.2	CUBIC SPLINES .....	99
6.3	PROCEDURE FOR FITTING CUBIC SPLINES .....	104
6.4	CHECKING SPLINE AND DATA COINCIDENCE .....	109
6.5	FITTING NON-POLYNOMIAL FUNCTIONS TO DATA ...	111

## CHAPTER 7 INITIAL-VALUE DIFFERENTIAL EQUATIONS

7.1	NUMERICAL STEPWISE INITIAL-VALUE METHODS ...	113
7.2	ADOPTION OF TAYLOR'S SERIES METHOD .....	113
7.3	SOLVING SINGLE DIFFERENTIAL EQUATIONS USING SIM. ROOTS .....	114
7.4	SOLVING SIMULTANEOUS DIFFERENTIAL EQUATIONS ...	119
7.5	TESTING AND IMPROVING ACCURACY .....	122

## CHAPTER 8 DIFF.ROOTS PROGRAM FOR INITIAL-VALUE EQUATIONS

8.1	DIFF.ROOTS FORMAT FOR SIMULTANEOUS DIFFERENTIAL EQUATIONS .....	127
8.2	OTHER DIFF.ROOTS OPTIONS .....	133
8.3	REDUCING THE BURDEN OF DIFFERENTIATION .....	134
8.4	OSCILLATING COUPLED BODIES .....	136

## CHAPTER 9 BOUNDARY, EIGENVALUE AND PARTIAL DIFFERENTIAL EQUATIONS

9.1	THE FINITE-DIFFERENCE EQUATIONS METHOD .....	140
9.2	THE SHOOTING METHOD .....	146
9.3	EIGENVALUE PROBLEMS .....	147
9.4	PARTIAL DIFFERENTIAL EQUATIONS .....	149

## CHAPTER 10 CONSTRAINTS IN EQUATIONS

10.1	NUMERICAL CONSTRAINTS .....	153
10.2	AN ALGEBRAIC COUNTER ALGORITHM .....	156
10.3	ALGEBRAIC CODE CONVERSION .....	160
10.4	CONSTRAINTS IN CURVE FITTING .....	165

APPENDIX A	BASIC MATHEMATICAL FUNCTIONS..	169
APPENDIX B	MICRO PROGRAMS .....	173
	B.1 MICRO.ROOTS PROGRAM .....	173
	B.2 MICRO.SIMROOTS PROGRAM ...	174
APPENDIX C	SIM.ROOTS FOR THE BBC COMPUTER..	176
APPENDIX D	LIST OF VARIABLES USED IN PROGRAMS .....	179
APPENDIX E	UTILITY PROGRAMS .....	183
	E.1 TURNING EQUATIONS INTO TEXT FILES .....	183
	E.2 FUNCTION PLOTTER .....	184
	E.3 SIMPSON'S RULE .....	187
	EVALUATING DETERMINANTS .....	188
APPENDIX F	ADDITIONS TO SIM.ROOTS TO IMPLEMENT DIFF.ROOTS .....	191
BIBLIOGRAPHY	.....	196
