

CONTENTS

PREFACE	v
1. PRELIMINARIES	1
1.1 Introduction	1
1.2 Notation and some inequalities	5
1.3 Approximation-theoretic results	9
1.4 Numerical stability	13
References	18
2. TWO-POINT BOUNDARY VALUE PROBLEMS	21
2.1 Introduction	21
2.2 Accuracy of the Galerkin approximation- H_0^1 and L^2 norm estimates	24
2.3 Piecewise-polynomial subspaces	28
2.4 L^∞ estimates	37
2.5 Superconvergence results	43
2.6 Quadrature Galerkin methods	49
2.7 Galerkin-type methods involving two subspaces	52
2.8 Nonlinear problems	57
Appendix	63
References	66
3. ELLIPTIC BOUNDARY-VALUE PROBLEMS	69
3.1 Basic Galerkin method	69
3.2 Multivariate piecewise polynomial functions	74
3.3 General Lagrange and Hermite interpolation	86
3.4 Approximate boundary conditions in the Galerkin method	91

3.5	Galerkin-type methods for the Dirichlet problem using subspaces without boundary conditions	98
3.6	The Neumann problem	107
3.7	Some computational considerations	110
3.8	Other topics	119
	References	123
4.	PARABOLIC PROBLEMS	131
4.1	Introduction	131
4.2	The continuous-time Galerkin method	132
4.3	A priori error estimates for the continuous-time Galerkin approximation	134
4.4	Discrete-time Galerkin procedures	146
4.5	A priori error estimates for the Crank-Nicolson Galerkin approximation	150
4.6	Nonlinear Neumann boundary conditions	157
4.7	Richardson extrapolation and Galerkin methods	160
4.8	Approximation of coefficients by interpolation	163
4.9	Procedures with subspaces not satisfying boundary conditions	167
4.10	L^∞ estimates and superconvergence results	173
4.11	High-order methods for linear problems	181
	References	187
5.	HYPERBOLIC PROBLEMS	193
5.1	First-order problems	193
5.2	The standard Galerkin method	194
5.3	The methods of Dendy	201
5.4	The methods of Wahlbin	205
5.5	Some applications	210
5.6	Second-order problems	216
	References	228

6. ALTERNATING DIRECTION GALERKIN METHODS FOR TIME-DEPENDENT PROBLEMS	233
6.1 Introduction	233
6.2 Parabolic problems	234
6.3 Oscillation and vibration problems	249
6.4 Alternating direction Galerkin methods on rectangular polygons	253
References	258
