

- 1 Chapter 1 Bézier Patches on Quadrics  
*Wolfgang Boehm and Dianne Hansford*
- 15 Chapter 2  $G^1$  Surface Interpolation over Irregular Meshes with Rational Curves  
*Hiroaki Chiyokura, Teiji Takamura, Koichi Konno, and Tsuyoshi Harada*
- 35 Chapter 3 Rational Bézier Curves and Surfaces on Projective Domains  
*Tony D. DeRose*
- 47 Chapter 4 Reparameterization and Degree Elevation for Rational Bézier Curves  
*Gerald Farin and Andrew Worsley*
- 59 Chapter 5 Constrained Interpolation Using Rational Cubic Splines  
*T. N. T. Goodman, B. H. Ong, and K. Unsworth*
- 75 Chapter 6 A Parametric Triangular Patch Based on Generalized Conics  
*Bernd Hamann, Gerald Farin, and Gregory M. Nielson*
- 87 Chapter 7 Generalized Rational B-Spline Surfaces  
*David H. Hoitsma and Mansuk Lee*
- 103 Chapter 8 The Rational Overhauser Curve  
*Jeffrey N. Jortner*
- 115 Chapter 9 B-Spline–Bézier Representation of Rational Geometric Spline Curves: Quartics and Quintics  
*Dieter Lasser and Arnim Purucker*
- 131 Chapter 10 Linear Fractional Transformations of Rational Bézier Curves  
*Miriam L. Lucian*
- 141 Chapter 11 A Projective Algorithm for Curvature Continuous Rational Splines  
*Helmut Pottmann*
- 149 Chapter 12 Approximating Rational Curves Using Polynomial Curves  
*Thomas W. Sederberg and Masanori Kakimoto*
- 159 Index
