CONTENTS

Introduction 5

Chapter 1. Monosplines and Quadrature Formulas 8

1.1. Statement of Optimization Problems 8
1.2. Boundary Conditions 9
1.3. Sets of Functions in One Variable 16
1.4. Monosplines 17
1.5. Auxiliary Lemmas 18
1.6. Basic Theorem 22
1.7. Quadrature Formulas of Markov's Type 27
1.8. Monospline of Least Deviation from Zero with Prescribed Knots 29

Chapter 2. One-Dimensional Optimal Quadrature Formulas .. 34

2.1. Markov's Systems 34
2.2. Algebraical Polynomials of Least Deviation from Zero 36
2.3. Optimal Q.F. for the Set $W_U^r L_q$ 39
2.4. Optimal Q.F. for the Set $W_{I_o, I_1}^r L_q$ 47
2.5. Optimal Q.F. for the Set $W^r L_q$ 50

Chapter 3. Optimal Quadrature Formulas for Periodic Functions 55

3.1. Bernoulli Polynomials and Associated Functions. 55
3.2. The Best Q.F. with Equidistant Nodes for $\tilde{W}^r L_q$.. 58
3.3. Closure of the Set of Monosplines with Free Knots 61
3.4. Properties of Optimal Q.F.-s 64
3.5. Existence of Optimal Q.F. 75
3.6. Construction of Optimal Q.F. 80
3.7. Modified Euler-Maclaurin Q.F. 84

Chapter 4. Optimal Two-Dimensional Quadrature Formulas... 87

4.1. Statement of Optimization Problems and Sets of Functions 87
4.2. Optimal Q.F. for the Set $W_{\vec{U}}^{\vec{r}} L_{\vec{q}}$ 90

4.3. Polynomials in Two Variables of Least Deviation from Zero in L_2 94
4.4. Green's Functions 97
4.5. Optimal Two-Dimensional Q.F. for the Set $W^{\vec{r}}_{\vec{0}}L_2$... 101
Chapter 5. Asymptotically Optimal Quadrature Formulas 107
5.1. Statement of Problem 107
5.2. Modified Gregory's Q.F. 107
5.3. Two-Dimensional Modified Gregory's Q.F. 113
Bibliography 115
Index of Symbols 121
