

TABLE OF CONTENTS

Chapter 1. Additional results on linear differential equations	11
1.1 Linear differential operators and their adjoints	11
1.2 The Green-Lagrange identity.	12
1.3 Relations between the solutions of a linear differential equation and those of the adjoint equation	13
1.4 Linear differential equations considered in infinite intervals	18
1.5 Problems	25
Chapter 2. Elementary quadrature formulae and a general procedure for constructing them.	27
2.1 The elementary quadrature formulae on a finite interval	27
2.2 The elementary quadrature formulae on the interval $[a, +\infty)$	32
2.3 Elementary quadrature formulae on the interval $(-\infty, +\infty)$	37
2.4 Some remarks on the rule for obtaining quadrature formulae	38
2.5 Gauss problem	41
2.6 Tchebychef problem	43
2.7 Problems	45
Chapter 3. Special functions	47
3.1 Bernoulli polynomials and numbers	47
3.2 Euler functions	50
3.3 Orthogonal polynomials connected to a given weight function.	52
3.4 Jacobi polynomials	58
3.5 Particular cases of Jacobi polynomials.	64
3.6 Laguerre polynomials	68
3.7 Hermite polynomials	70
3.8 Some notions on divided differences.	71
3.9 The s -orthogonal polynomials connected to a given weight	74
3.10 Problems	78

Chapter 4. Various examples of elementary quadrature formulae . . .	80
4.1 General remarks on the contents of this chapter . . .	80
4.2 Deduction of three classical formulae	80
4.3 The Euler-MacLaurin formula	84
4.4 Other examples of application of the generale rule . .	86
4.5 The Gauss-Jacobi formulae	92
4.6 Particular cases of the Gauss-Jacobi formulae	97
4.7 The Bouzitat formulae of the first kind	101
4.8 The Bouzitat formulae of the second kind	106
4.9 Gauss-Laguerre formulae	110
4.10 Gauss-Hermite formulae	114
4.11 Newton-Cotes formulae	116
4.12 Examples of Tchebychef problems	124
4.13 Quadrature formulae connected to s -orthogonal poly- nomials	131
4.14 Some examples of quadrature formulae exact for trigo- nometric polynomials	139
4.15 Problems	145
Chapter 5: Generalized quadrature formulae and questions of conver- gence	148
5.1 Generalized quadrature formulae in the case of the constant weight	148
5.2 Generalized quadrature formulae with any weight . .	153
5.3 An example of generalized quadrature formula	159
5.4 Problems	163
Chapter 6. Solutions to problems	164
6.1 Solutions to problems of § 1.5	164
6.2 Solutions to problems of § 2.7	167
6.3 Solutions to problems of § 3.10	169
6.4 Solutions to problems of § 4.15	174
6.5 Solutions to problems of § 5.4	183
Bibliography	191
