Series Preface	v	
Preface	vii	
1	Complex Numbers	1
1.1	Complex Numbers	1
	Polar Coordinates	
1.2	Exponential Notation	5
	De Moivre's Formula, Roots of a Complex Number	
2	Convergence and Limit	11
2.1	Convergence and Limit	11
	Cauchy Criterion, Tests for Convergence	
2.2	Function of a Complex Variable: Continuity	16
2.3	Sequences and Series of Functions	19
	Power Series	
3	Differentiation and Integration	27
3.1	Differentiation: Cauchy–Riemann Equations	27
3.2	Integration: Cauchy's Integral Theorem	29
3.3	Differentiation and Integration of Power Series	33
3.4	Cauchy's Integral Formula. Cauchy's Theorem in Multiply Connected Domains	36
	Liouville's Theorem	
3.5	The Taylor and Laurent Expansions	43
3.6	Singularities of Analytic Functions	51
3.7	Residue Theory	59
	Partial Fractions, Residue at Infinity, Evaluation of Real Integrals	

4	Discrete Linear Systems	77
4.1	Introduction to Linear Systems	77
	Linearity, Translational Invariance, Causality, Reciprocity Between Cause and Effect	
4.2	Periodic Sequences	83
	Elementary Properties	
4.3	Discrete Periodic Inputs	94
4.4	Applications	102
	Visual System of the Horseshoe Crab, Mach Bands, Cell Model of Diffusion	
4.5	The $Z$ -Transform and Applications	114
	Coin Tossing, Brownian Motion, Diffusion, Predator-Prey Equations, Differential Equations, $Z$ -Transforms, Inversion, Application of the $Z$ -Transform to Difference Equations, Coin Tossing Problem	
4.6	The Double $Z$ -Transform	126
4.7	The Wiener-Hopf Method: Discrete Form	129
	Appendix: The Fast Fourier Algorithm	132
5	Fourier Series and Applications	134
5.1	Fourier Series — Heuristic Approach	134
5.2	Riemann-Lebesgue Lemma	137
5.3	Fourier's Theorem	139
5.4	Miscellaneous Extensions	142
	Convolution, Nonperiodic Functions, Periodic Functions of Arbitrary Period, Trigonometric Series, Even Functions, Odd Functions	
5.5	Examples of Fourier Series	147
	Square Wave, Triangle Wave, Sawtooth Wave	
5.6	Gibb's Phenomenon	152
5.7	Integration and Differentiation of Fourier Series	158
5.8	Application to Ordinary Differential Equations	161
	Finite Fourier Transform	
6	Spaces of Functions	168
6.0	Introduction	168
6.1	Discrete and Continuous Fourier Expansions— Geometrical Extensions	168

6.2	Orthogonal Functions Tchebycheff Polynomials, Properties of the Tchebycheff Polynomials, Geometrical Considerations, Legendre Polynomials, Gram-Schmidt Procedure	177
6.3	Comparison of Tchebycheff and Legendre Expansions	194
6.4	Orthogonal Functions — Continued Hermite Polynomials, Laguerre Polynomials	199
6.5	Sturm-Liouville Theory	208
6.6	Orthogonal Expansions in Higher Dimensions Trigonometric Series, Polynomial Expansions, Mixed Expansions	220
7	Partial Differential Equations	223
7.1	Conservation Laws Diffusion, Fick's Law, Traffic Flow, Heat Flow, Boundary and Initial Conditions, Heat Flow and Diffusion in Space, Laplace's Equation, Wave Equation	223
7.2	Elementary Problems The Diffusion Equation, An Eigenfunction Approach, Heat Conduction on an Interval, Earth's Temperature Profile, The Wave Equation, Wave Propagation on an Interval, Laplace's Equation	243
8	The Fourier and Laplace Transforms	261
8.1	Fourier Integral Linear Systems, The Diffusion Equation	261
8.2	Laplace Transform Properties of the Laplace Transform	273
8.3	Convolution Properties	285
8.4	Differential Equations with Constant Coefficients	288
9	Partial Differential Equations (Continued)	294
9.1	Canonical Forms for Second Order Equations Hyperbolic Case, Elliptic Case, Parabolic Case	294
9.2	Hyperbolic Case — The Wave Equation	300

	Inhomogeneous Problem, Energy Integral, Uniqueness, A Geometrical Construction, Reflection and Transmission of Waves	
9.3	Parabolic Case — The Diffusion Equation Boundary and Initial Conditions, Energy Conservation, Uniqueness, Maximum Principle, Transform Methods, Quarter-Space Problem, Finite Problem, Heat Flow on a Ring — Again	313
9.4	The Potential Equation Physical Models, Boundary Value Problems, Mean Value Property, Maximum (Minimum) Principle, Uniqueness, Some Special Solutions, Green's Identities, Green's Function, Examples of Green's Functions, Series Solutions, Spherical Harmonics	325
9.5	Laplace's Equation — Two-Dimensional Problems Some Fluid Flows, Some Heat Flow Problems, Fractional Linear Transformations, Flow Past a Body	341
	References	363
	Index	365
