

# CONTENTS

Preface . . . . .	<i>vii</i>
1. Preliminaries . . . . .	1
2. Linear Algebraic Equations . . . . .	6
3. Interpolation and Extrapolation . . . . .	22
4. Integration of Functions . . . . .	35
5. Evaluation of Functions . . . . .	43
6. Special Functions . . . . .	53
7. Random Numbers . . . . .	78
8. Sorting . . . . .	99
9. Root Finding and Sets of Equations . . . . .	110
10. Minimization and Maximization of Functions . . . . .	121
11. Eigensystems . . . . .	136
12. Fourier Methods . . . . .	148
13. Statistical Description of Data . . . . .	164
14. Modeling of Data . . . . .	187
15. Ordinary Differential Equations . . . . .	201
16. Two-Point Boundary Value Problems . . . . .	211
17. Partial Differential Equations . . . . .	217
Index of Demonstrated Procedures . . . . .	221
