**Part 1 Introduction** 1

1 Some questions (and answers) 3

2 Fortran notes 5
- 2.1 Fortran subroutines and functions 5
- 2.2 Supplying a routine as a parameter 8
- 2.3 Declaration of variables 9
- 2.4 Dimensions of arrays in subroutines 10
- 2.5 COMMON statements 12

3 Introduction to the NAG routine descriptions 13
- 3.1 Layout of the descriptions 13
- 3.2 The error parameter 14
- 3.3 Workspace 15
- 3.4 Notes on the use of the specimen programs 15

4 Specimen routine descriptions 17
- 4.1 Solutions of a polynomial equation (C02AEF) 17
- 4.2 Solutions of $f(x) = 0$ (C05ADF) 23
- 4.3 Linear simultaneous equations (F04ARF) 27

5 Avoiding mistakes 32
- 5.1 Preliminary runs 32
- 5.2 Data checking and data files 33
- 5.3 Further use of IFAIL 34
- 5.4 Accuracy of the answer 36
- 5.5 Reliability of the answer (ill-conditioning) 38

**Part 2 Some 'Easy-To-Use' NAG Routines** 41

6 Routine descriptions 43
- 6.1 Discrete Fourier Transform (C06ECF) 43
- 6.2 Integral of a function (D01AJF) 46
- 6.3 Integral from data points (D01GAF) 52
- 6.4 Ordinary differential equations (D02BAF) 55
- Addendum: D02BBF 63

6.5 Curve-fitting, polynomial approximation (E02ADF) 69
6.6 Points from Chebyshev coefficients (E02AEF) 77
6.7 Minimum of a function (E04JAF) 84
6.8 Linear programming (E04MBF) 92
6.9 Eigenvalues and eigenvectors (F02AGF) 103
6.10 Linear simultaneous equations (F04AEF) 108
6.11 Summary statistics (G01AAF) 115
6.12 Contingency table (G01AFF) 120
6.13 Multiple regression (G02CJF) 126
6.14 Number sort (descending order) (M01AKF) 133
6.15 Evaluation of Bessel function $J_0(x)$ (S17AEF) 137
Evaluation of Bessel function $J_1(x)$ (S17AFF) 137

7 The NAG Graphical Supplement 140
7.1 J06: Introduction 140
7.2 A basic framework 141
7.3 Axes (J06AAF) 145
7.4 Plotting points (J06BAF) 148
7.5 Smooth curve through points(J06CAF) 152
7.6 Graph of $y = f(x)$ (J06EAF) 159
7.7 Contour map (J06GEF) 163

**Part 3 The NAG Library** 169

8 Approaching the NAG Library 171

9 How to approach a NAG routine (F04ASF) 175
9.1 Essential information 175
9.2 Housekeeping 182
9.3 Specimen program 184
9.4 Chapter summary 185

10 Some specimen NAG routine documents 186
10.1 Introduction 186
10.2 Eigenvalues and eigenvectors (symmetric matrix) (F02ABF) 187
10.3 Linear simultaneous equations (complex coefficients) (F04ADF) 193
10.4 Solution of non-linear simultaneous equations (C05NBF) 201
10.5 Multiple integral (with constant limits) (D01GBF) 210
10.6 Linear simultaneous equations (symmetric positive-definite band matrix) (F04ACF) 219
10.7 Least-squares minimization (E04FDF) 228
