Preface	5
---------------	---

CHAPTER ONE

THE INTERPOLATIONAL POLYNOMIAL

ALBERT A. BENNETT

Introduction	11
1.1. Tabular Index and Tabular Arguments.....	13
1.2. Tabular Values and Differences.....	15
1.3. Displacements, Divided Differences, Repeated Arguments.....	18
1.4. The Interpolational Polynomial.....	20
1.5. The Derivative of the Interpolational Polynomial.....	26
1.6. The Integral of the Interpolational Polynomial.....	27
1.7. Caution to be Observed in the Use of the Interpolational Polynomial with Tables of Constant Argument Difference.....	34
General Bibliography	38

CHAPTER TWO

SUCCESSIVE APPROXIMATIONS

ALBERT A. BENNETT

2.1. Rise of Numerical Methods of Successive Substitutions.....	51
2.2. Introduction of Approximate Methods in the Solution of Differential Equations	58
2.3. The Method of Successive Substitutions in Differential Equations.....	65

CHAPTER THREE

STEP-BY-STEP METHODS OF INTEGRATION

WILLIAM E. MILNE

3.1. Differential Equations of the First Order.....	71
3.1.1. Method of Taylor's Series.....	71
3.1.2. Methods Using Differences.....	73
3.1.3. Methods Using Ordinates.....	75
3.1.4. The Runge-Kutta Method.....	77
3.2. Systems of Differential Equations of the First Order.....	79
3.3. Differential Equations of Higher Order.....	80
3.4. Equations of the Second Order in Which First Derivatives are Absent..	81
3.4.1. Methods Using Differences.....	81
3.4.2. Methods Using Ordinates.....	83
3.4.3. Nystrom's Form of the Runge-Kutta Method.....	84
Supplementary Bibliography	84

CHAPTER FOUR

METHODS FOR PARTIAL DIFFERENTIAL EQUATIONS

HARRY BATEMAN

	PAGE
4.1. The Transition from the Solution of Difference Equations to the Solution of Differential Equations.....	88
4.2. The Method of Walther Ritz.....	91
4.3. The Method of Least Squares.....	94
4.4. Extension of the Solution of a Differential Equation to Nonintegral Values of a Parameter.....	96
Supplementary Bibliography	102
Index	105
