Preface . . . . .	v
<b>1 Some Interrelationships Between the Theories of Recurrence Relations and Ordinary Differential Equations</b>	
1.1 Introduction. . . . .	1
1.2 Some results from the theory of linear recurrence relations . . . . .	2
1.3 Some stability aspects of linear multistep methods . . . . .	5
<b>2 An Investigation of Algorithms for the Solution of Recurrence Relations</b>	
2.1 Second order linear recurrence relations . . . . .	14
2.2 An extension to the vector case . . . . .	19
2.3 Iterative algorithms for the solution of linear recurrence relations . . . . .	24
2.4 Non-linear recurrence relations . . . . .	32
2.5 Higher order recurrence relations . . . . .	40
2.6 A quadratic factor approach . . . . .	49
2.7 Another class of iteration schemes . . . . .	58
<b>3 Iterative Algorithms for the Solution of Differential Equations</b>	
3.1 Non-stiff systems of equations . . . . .	65
3.2 Adams-type methods . . . . .	72
3.3 Some other classes of integration formulae . . . . .	84
3.4 Stability aspects of iterative integration procedures . . . . .	89
3.5 Stiff systems of equations . . . . .	97
3.6 A high order one-step integration formula . . . . .	97
3.7 Extension to the multistep case . . . . .	101
3.8 Computational aspects of iterative formulae . . . . .	106
3.9 Another class of iterative schemes . . . . .	110
3.10 Cyclic iterative integration procedures . . . . .	122

3.11	Miscellaneous iteration schemes . . . . .	126
3.12	Second order equations . . . . .	130
3.13	Applications to partial differential equations . . . . .	152
<b>4</b>	<b>Some Iterative Algorithms Without Truncation Error and their Connection with Singular Perturbation Methods for the Solution of O.D.E.s</b>	
4.1	Iterative solution of linear second order O.D.E.s . . . . .	166
4.2	Extension of Olver's approach to the solution of O.D.E.s . . . . .	172
4.3	Computational aspects. . . . .	178
4.4	A special class of second order O.D.E.s . . . . .	179
4.5	A particular example . . . . .	182
4.6	Ordinary differential equations of order greater than 2 . . . . .	186
4.7	Linear first order systems of ordinary differential equations . . . . .	192
4.8	Extension to the non-linear case . . . . .	202
4.9	Connections with existing algorithms . . . . .	205
4.10	Linear second order O.D.E.s re-considered . . . . .	211
	References . . . . .	217
	Index . . . . .	220
