<b>Preface</b> .....	xi
Availability and Installation .....	xi
Getting Started .....	xiii
Acknowledgements .....	xiii
<b>CHAPTER 1. Introduction</b> .....	1
1.1 Problem Specification .....	1
1.2 A Simple Example .....	4
1.3 Design Considerations .....	10
<b>CHAPTER 2. Subroutine PLTMG</b> .....	15
2.1 The Domain and the Boundary .....	15
2.2 The Partial Differential Equation .....	18
2.3 Discretization, Numerical Quadrature, and Sparse Matrix Storage .....	20
2.4 Level-1 Continuation .....	22
2.5 Grid Refinement .....	26
2.6 Equation Solution .....	32
2.7 The IP and W Arrays .....	35
2.8 Flags and Error Conditions .....	39
2.9 Printed Output .....	39
<b>CHAPTER 3. Subroutine TRIGEN</b> .....	43
3.1 The Domain and the Boundary .....	43
3.2 Some Algorithmic Details .....	48
3.3 The IP and W Arrays .....	50

<b>CHAPTER 4. Subroutine TRIPLT</b> .....	53
4.1 Parameter Definitions .....	53
4.2 Surface Plots .....	56
4.3 Triangle Plots .....	56
4.4 Vector Plots .....	59
4.5 The Parameters (NX,NY,NZ) .....	61
4.6 The Parameters MAG, IX, and IY .....	61
4.7 The Parameters ISCALE, LINES, and NUMBRS .....	63
4.8 Some Algorithmic Details .....	67
<b>CHAPTER 5. Subroutine GPHPLT</b> .....	71
5.1 Parameter Definitions .....	71
5.2 Displaying the IP array .....	72
5.3 Continuation Path .....	73
5.4 Timing Statistics .....	73
5.5 Error Estimates .....	74
5.6 Convergence Histories .....	75
<b>CHAPTER 6. Subroutine INPLT</b> .....	79
6.1 Parameter Definitions .....	79
<b>CHAPTER 7. Subroutine PLTEVL</b> .....	83
7.1 Parameter Definitions .....	83
7.2 Some Algorithmic Details .....	85
<b>CHAPTER 8. Subroutine SKELTN</b> .....	87
8.1 Input and Output Parameters .....	88
8.2 Some Algorithmic Details .....	91
<b>CHAPTER 9. Program ATEST</b> .....	95
9.1 Available Commands .....	95
9.2 Array Dimensions and Initialization .....	99
9.3 The D and L commands .....	101
9.4 The R command .....	102
9.5 Subroutine USRCMD .....	102
9.6 Subroutine GDATA .....	105

<b>CHAPTER 10. Machine Dependent Routines</b> .....	109
10.1 Timing .....	109
10.2 Graphics .....	109
10.3 Obtaining Input .....	113
<b>CHAPTER 11. Examples</b> .....	115
11.1 Bratu's Problem .....	115
11.2 A Linear Eigenvalue Problem .....	122
11.3 A Convection-Diffusion Equation .....	125
11.4 Creating a Mesh Using TRIGEN .....	131
11.5 Creating a Skeleton Using SKELTN .....	135
<b>CHAPTER 12. Test Problems</b> .....	141
12.1 Test Problem CIRCLE .....	141
12.2 Test Problem SQUARE .....	142
12.3 Test Problem DOMAINS .....	144
12.4 Test Problem NACA .....	145
12.5 Test Problem JCN .....	152
<b>Bibliography</b> .....	155
<b>Index</b> .....	159
