

CONTENTS

Part 1: THE ELLPACK SYSTEM

1. INTRODUCTION	3
A. Mathematical Preliminaries	3
B. Numerical Methods Preliminaries	7
C. The ELLPACK Project	15
D. Brief Description of ELLPACK	16
E. A Simple Program	18
F. Organization of the Book	21
G. References	23
2. THE ELLPACK LANGUAGE	25
A. Organization of an ELLPACK Program	25
B. Segments which Define the Problem	28
C. The GRID Segment	32
D. Segments which Specify the Numerical Methods	35
E. Fortran and Program Control	39
F. OUTPUT and OPTIONS Segments	40
G. Debugging ELLPACK Programs	44
H. References	47
3. EXAMPLES	49
A. Example of Chapter 1 Revised	49
B. General Equation with Mixed Boundary Conditions	52
C. How Fortran and ELLPACK Interact	56
4. ADVANCED ELLPACK FEATURES	61
A. Additional Segments	62
B. Additional Features of Basic Segments	64
C. Access to Preprocessor Variables	70
D. Advanced ELLPACK Examples	71
E. References	86
5. EXTENDING ELLPACK TO NONSTANDARD PROBLEMS	87
A. Special Interior Boundary Conditions	88
B. Two-Phase Diffusion Problem	95
C. Newton Iteration for Nonlinear Problems	101
D. Time Dependent Problem	111
E. Systems of Elliptic Problems	121
F. References	135

Part 2: THE ELLPACK MODULES

6. THE ELLPACK MODULES	139
A. Introduction	139
B. Description of the Modules	141
C. The Modules	146
7. ITPACK SOLUTION MODULES	237
by D. R. Kincaid, T. C. Oppe, J. R. Respass, and D. M. Young	
A. ITPACK Iterative Algorithms	237
B. ITPACK Modules	244
C. ITPACK Project	255
D. References	257

Part 3: PERFORMANCE EVALUATION

8. PERFORMANCE AND ITS EVALUATION	261
A. Measures of Performance	261
B. Analytical Evaluation of Performance	262
C. Experimental Evaluation of Performance	262
9. THE MODEL PROBLEMS	265
10. PERFORMANCE OF DISCRETIZATION MODULES	269
A. Poisson Problem	269
B. Helmholtz Problem	274
C. Boundary Layer Problem	278
D. General Elliptic Operator	281
E. General, Difficult Elliptic Problem	284
F. Mixed Boundary Conditions	287
G. Singular Problem	289
H. Nonrectangular Domain	291
I. Three Dimensional Poisson Problem	293
11. PERFORMANCE OF SOLUTION MODULES	295
A. Solution of the 5-Point Star Equations	297
B. Solution of the HODIE-Helmholtz Equations	301
C. Solution of the Collocation Equations	303
D. Solution of the Galerkin Equations	304
E. Solution of the 7 Point 3D Equations	305
F. References	307

Part 4: CONTRIBUTOR'S GUIDE

12. SOFTWARE PARTS FOR ELLIPTIC PROBLEMS	311
A. Overview	311
B. Contributor's checklist	314

C. Conventions	316
D. References	318
13. INTERFACE SPECIFICATIONS	319
A. Problem interface	319
B. Discretized domain interface	324
C. Discretized PDE Interface	330
D. Equation/unknown indexing interface	331
E. Algebraic equation solution interface	332
F. Triple and procedure modules	333
G. Solution evaluation	333
H. Control variables	335
14. MODULE INTERFACE ACCESS	343
A. Storage Scheme for Interface Variables	343
B. Module-Parameter Access	345
C. Workspace Access	346
15. PROGRAMMING STANDARDS	347
A. Printed Output	347
B. Error Handling	348
C. Portability	350
D. Documentation	351
E. Utility Programs	352
F. References	356
16. PREPROCESSOR DATA	357
A. Introduction to the Preprocessor	357
B. The ELLPACK Definition File	360
C. Examples of File Entries	367
D. Conditional Code Generation	369

Part 5: SYSTEM PROGRAMMING GUIDE

17. INSTALLING ELLPACK	373
A. Overview of the System	373
B. Installation Procedure Summary	374
C. The ELLPACK Tape	375
D. Preparing the ELLPACK Modules	377
E. Preparing the ELLPACK Preprocessor	384
F. Sample control card procedures	386
G. References	391
18. TAILORING ELLPACK	393
A. Organization of the Preprocessor	393
B. Organization of the ELLPACK Control Program	396
C. How to Add Modules to ELLPACK	406
D. How to Change the ELLPACK Language	410

APPENDICES

A. THE PDE POPULATION	417
by W. R. Dyksen, E. N. Houstis and J. R. Rice	
1. Introduction	417
2. Characteristics of the Problems	418
3. Format of PDE Problem Descriptions	423
4. Acknowledgements	424
5. Problem Definitions and Plots	424
6. Sources of Problems	452
7. References	453
B. THE PG (PREPROCESSOR GENERATOR) SYSTEM	455
by J. F. Brophy	
1. Introduction to PG Grammars	455
2. PG Rule Syntax	460
3. PG Actions	461
4. Special Segments	462
5. PG Internals	465
6. Installing PG	466
7. Acknowledgements	467
8. References	467
C. THE TEMPLATE PROCESSOR	469
by J. R. Rice, C. J. Ribbens and W. A. Ward	
1. Introduction	469
2. General Description	470
3. Simple Example	471
4. Substitution Processing Facilities	472
5. Macro Processing Directives	475
6. Another Example	479
7. Preparing a Tuned Version of the Template Processor	481
8. Error Messages	482
9. References	484
D. EXAMPLES OF SOME ELLPACK STATEMENTS	485
INDEX	489
