*Preface* *v*

CHAPTER 1 The World of Scientific Computing 1

1.1 What Is Scientific Computing 1
1.2 Mathematical Modeling 3
1.3 The Process of Numerical Solution 6
1.4 The Impact of Computer Science on Scientific Computing 11

CHAPTER 2 Initial-Value Problems in Ordinary Differential Equations 22

2.1 Examples of Initial-Value Problems 22
2.2 Numerical Solutions: One-step Methods 28
2.3 Polynomial Interpolation 43
2.4 Numerical Solutions: Multistep Methods 50
2.5 Stability, Instability, and Stiff Equations 59

CHAPTER 3 Pinning It Down on Both Ends: Two-Point Boundary-Value Problems 69

3.1 A Diffusion Problem 69
3.2 The Finite Difference Method for Linear Problems 74

3.3 Solution of Systems of Linear Equations 84
3.4 Interchanges 96
3.5 Ill-Conditioning and Error Analysis 105

CHAPTER 4 Life Is Really Nonlinear 119

4.1 Solution by the Shooting Method 119
4.2 Solution of Nonlinear Equations in a Single Variable 124
4.3 Solution of Systems of Nonlinear Equations 137
4.4 Finite Difference Methods for Nonlinear Boundary-Value Problems 145

CHAPTER 5 Is There More to Computing Than Finite Differences? 152

5.1 Introduction to Projection Methods 152
5.2 Spline and Least-Squares Approximation 160
5.3 Numerical Integration 176
5.4 The Discrete Problem Using Splines 184

CHAPTER 6 *n* Important Numbers: Eigenvalue Computations 196

6.1 Examples of Eigenvalue Problems and Mathematical Background 196
6.2 The Symmetric Eigenvalue Problem 209
6.3 The QR Method 220
6.4 Methods for Large Sparse Matrices 230

CHAPTER 7 Space and Time 236

7.1 Partial Differential Equations 236
7.2 Explicit Methods and the Stability Problem 243
7.3 Implicit Methods 252
7.4 Semidiscrete Methods 257

CHAPTER 8 The Curse of Dimensionality 263

8.1 Problems in Two and Three Space Dimensions 263
8.2 Discretization Problems in Two Space Dimensions 268

8.3 Direct Methods for Large Sparse Systems 276
8.4 Interative Methods 288

Appendix 1 Basic Results from Analysis 305
Appendix 2 Ordinary Differential Equations 308
Appendix 3 Linear Algebra and Matrix Theory 311
Bibliography 317
Author Index 323
Subject Index 325
