

# C O N T E N T S

Preface		
Chapter 1: Notation		1
Chapter 2: Introduction		5
PART I : BOUNDARY VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS		10
Chapter 3: Sobolev spaces, $N=1$		11
Chapter 4: Weak solutions of boundary value problems for ordinary differential equations		13
Chapter 5: Bounded nonlinear perturbations of linear invertible operators		26
Chapter 6: Bounded nonlinear perturbations of linear noninvertible operators		30
PART II : NONLINEAR PERTURBATIONS OF LINEAR INVERTIBLE OPERATORS		39
Chapter 7: Abstract results		40
Chapter 8: Solvability of boundary value problems for ordinary differential equations		44
PART III : NONLINEAR PERTURBATIONS OF LINEAR NONINVERTIBLE OPERATORS		53
Chapter 9: Alternative lemma		55
Chapter 10: Abstract results of the Landesman-Lazer type		59
Chapter 11: Sublinear nonlinearities		67
Chapter 12: Nonlinear operators with a linear growth		71
Chapter 13: Solvability of boundary value problems for ordinary differential equations with bounded nonlinearities		73
Chapter 14: Solvability of boundary value problems for ordinary differential equations with sublinear nonlinearities		86
Chapter 15: Solvability of boundary value problems for ordinary differential equations whose nonlinearities are of a linear growth		95
PART IV : BOUNDARY VALUE PROBLEMS FOR PARTIAL DIFFERENTIAL EQUATIONS		103
Chapter 16: Sobolev spaces ( $N \geq 1$ )		104
Chapter 17: Weak solutions of boundary value problems for partial differential equations		107
Chapter 18: Nonlinear perturbations of linear partial differential operators		110

PART V	: PERIODIC PROBLEM FOR ORDINARY DIFFERENTIAL EQUATIONS (INTRODUCTION)	117
Chapter 19:	Linear differential operators with constant coefficients in spaces of T-periodic functions; some examples	118
PART VI	: METHOD OF A PRIORI ESTIMATES	132
Chapter 20:	Definition and properties of the Leray-Schauder degree	134
Chapter 21:	Abstract result	140
Chapter 22:	Existence of periodic solutions of generalized Liénard vector equations with forcing terms	144
APPENDIX A:	Historical and bibliographical notes	157
PART VII	: METHOD OF TRUNCATED EQUATIONS	163
Chapter 23:	Introduction	163
Chapter 24:	Dirichlet problem for nonlinear second order ordinary differential equations	169
Chapter 25:	Boundary value problem with bounded nonlinearity and general null-space of the linear part	175
Chapter 26:	Periodic solutions of ordinary differential equations	187
PART VIII:	POTENTIAL EQUATIONS	196
Chapter 27:	Elementary critical point principle	197
Chapter 28:	Abstract result	203
Chapter 29:	Nonlinear elliptic boundary value problems	211
Chapter 30:	Variational approach	221
PART IX	: EQUATIONS WITH SUPERLINEAR NONLINEARITIES	233
Chapter 31:	Application of the alternative lemma	234
Chapter 32:	Dirichlet problem for nonlinear second order ordinary differential equations	240
Chapter 33:	Abstract result of Kazdan-Warner type	247
Chapter 34:	Classical solutions of Dirichlet problem for second order partial differential equations	253
Chapter 35:	The method of P. Hess	265
PART X	: EQUATIONS WITH RAPID NONLINEARITIES	276
Chapter 36:	Introduction	276
Chapter 37:	Auxiliary lemmas	280
Chapter 38:	Proof of Theorem 36.8	295
Chapter 39:	Proof of Theorem 36.10	299

PART XI : EQUATIONS WITH JUMPING NONLINEARITIES	303
Chapter 40: Ranges of perturbations of positively homogeneous operators	304
Chapter 41: Results of the Ambrosetti-Prodi type	314
Chapter 42: Second order ordinary differential equations	322
Chapter 43: Results of E. N. Dancer	326
Chapter 44: Further examples	332
PART XII : EPILOGUE	335
Chapter 45: Periodic solutions of boundary value problems for nonlinear heat equation	336
Chapter 46: Periodic solutions of the nonlinear telegraph equation	343
Chapter 47: Existence of multiple solutions of nonlinear equations	347
REFERENCES	358
APPENDIX B: Supplementary references	373
SUBJECT INDEX	382
LIST OF SYMBOLS	389
