

TABLE OF CONTENTS

<u>Part 1: Optimization</u>	1
M. Atteia, A. El Qortobi Quasi-Convex Duality	3
J.-P. Crouzeix Some Differentiability Properties of Quasiconvex Functions on \mathbb{R}^n	9
J. Gwinner On Optimality Conditions for Infinite Programs	21
J.-B. Hiriart-Urruty Optimality Conditions for Discrete Nonlinear Norm-Approximation Problems	29
P. Huard Feasible Variable Metric Method for Nonlinearly Constrained Problems	43
B. Korte, R. Schrader A Note on Convergence Proofs for Shor-Khachian-Methods	51
C. Lemaréchal A View of Line-Searches	59
E.A. Nurminski II-Approximation and Decomposition of Large-Scale Problems	79
J.-P. Penot On the Existence of Lagrange Multipliers in Nonlinear Programming in Banach Spaces	89
S. Schaible, I. Zang Convexifiable Pseudoconvex and Strictly Pseudoconvex C^2 -Functions (Extended Abstract)	105
K. Schittkowski Organization, Test, and Performance of Optimization Programs	109
P. Spellucci Han's Method without Solving QP	123
<u>Part 2: Optimal Control</u>	143
M. Brokate Necessary Optimality Conditions for Differential Games with Transition Surfaces	145
F. Colonius Regularization of Lagrange Multipliers for Time Delay Systems with Fixed Final State	163

W. Hackbusch	
Numerical Solution of Linear and Nonlinear Parabolic Control Problems	179
M. Kohlmann	
Survey on Existence Results in Nonlinear Optimal Stochastic Control of Semimartingales	187
W. Krabs	
Time-Minimal Controllability in the View of Optimization	211
D. Kraft	
On the Choice of Minimization Algorithms in Parametric Optimal Control Problems	219
U. Mackenroth	
Strong Duality, Weak Duality and Penalization for a State Constrained Parabolic Control Problem	233
K. Malanowski	
Finite Difference Approximations to Constrained Optimal Control Problems	243
