

PART I  
CHAPTER 1

# Concepts of Algorithmic Computation\*)

Achim BACHEM

West Germany*

## Contents

|   |    |
|---|----|
| 1. Introduction .....                             | 4  |
| 2. Machines, programs and computations .....      | 6  |
| 2.1. Machines .....                               | 7  |
| 2.2. The elementary instruction set .....         | 10 |
| 2.3. Programs and computations .....              | 11 |
| 2.4. Abstract complexity measures .....           | 12 |
| 2.5. Time and space complexity measures .....     | 14 |
| 2.6. Worst case and average case complexity ..... | 14 |
| 2.7. Asymptotic time (space) complexity .....     | 15 |
| 2.8. Simulation .....                             | 15 |
| 2.9. Literature .....                             | 17 |
| 3. Basic machine models .....                     | 17 |
| 3.1. Input and output devices .....               | 17 |
| 3.2. Storage devices .....                        | 19 |
| 3.3. Random storage structure .....               | 19 |

\*) Supported by Sonderforschungsbereich 21 (DFG), Institut für Ökonometrie und Operations Research, Universität Bonn.

|  |    |
|--|----|
| 3.4. Time and space complexity of the RAM machine .....      | 20 |
| 3.5. Linked list storage structure .....                     | 21 |
| 3.6. Time and space complexity of the $n$ -SMM machine ..... | 27 |
| 3.7. Sequential structured storage .....                     | 28 |
| 3.8. Time and space complexity of the Turing machine .....   | 30 |
| 3.9. Literature .....  | 30 |
| 4. The equivalence of machine models .....                   | 31 |
| 4.1. Variants of the Turing machine .....                    | 31 |
| 4.2. The variants of the RAM machine .....                   | 33 |
| 4.3. Variants of the URM machine .....                       | 36 |
| 4.4. Real time simulation with uniform cost function .....   | 37 |
| 4.5. Simulation with logarithmic cost functions .....        | 38 |
| 4.6. Literature .....  | 38 |
| 5. Algorithms and recursive functions .....                  | 39 |
| 5.1. Recursive functions .....                               | 39 |
| 5.2. Primitive recursive functions .....                     | 39 |
| 5.3. Recursive and partial recursive functions .....         | 41 |
| 5.4. Number theoretic and finite alphabet functions .....    | 41 |
| 5.5. Recursive machines .....                                | 42 |
| 5.6. Computability and algorithms .....                      | 42 |
| 5.7. Church and Kleene's thesis .....                        | 43 |
| 5.8. Recursive and recursively enumerable sets .....         | 44 |
| 5.9. Diophantine sets .....                                  | 45 |
| 5.10. Hilbert's tenth problem .....                          | 45 |
| 5.11. Literature .....                                       | 46 |
| References .....   | 46 |
