

Contents

	List of Figures	xi
	List of Tables	xiii
	Preface	xvii
	Acknowledgments	xix
Chapter 1	Introduction	1
	Decision Models	1
	Goals of the Text	3
	History of Related Decision Models	3
	Assumptions	5
	Example	6
	Coverage	7
Chapter 2	Problem Formulation	11
	General Approach	11
	Determining the Decision Variables	11
	Formulation of the Objective Functions	12
	Absolute Objectives	15
	Assigning Objectives to Priority Levels	15
	Forming the Achievement Function	16
	The General Goal Program Model	17
	Formulation Examples	18
	Further Practice in Model Building	25
	Problems	26
Chapter 3	Linear Goal Programming	31
	The Linear Goal Program Model	31
	Graphical Analysis	31
	Definitions	36
	The Modified Simplex Method	42
	Complications and Their Resolution	53
	Linear Programming	60
	Conclusions	66
	Problems	66

Chapter 4	Post Optimality Analysis and Duality in Linear Goal Programming	73
	The Need for Post Optimality Analysis	73
	Tableau Interpretation in Linear Goal Programming	73
	Changes to Be Considered	78
	A Change in $w_{k,s}$ or $u_{i,k}$	78
	A Change in b_i	80
	The Dual Simplex Algorithm in Linear Goal Programming	81
	Changes in $c_{i,j}$	84
	Addition of a New Objective	85
	Addition of a New Decision Variable	87
	Reordering of Priority Levels	89
	Parametric Linear Goal Programming	90
	The Multidimensional Dual	98
	Extensions of the Multidimensional Dual Problems	113
		114
Chapter 5	Linear Integer Goal Programming	119
	The Multiple Objective Model with Integer Variables	119
	The Cutting Plane Approach	120
	The All Integer Cutting Plane Algorithm	121
	The Branch-and-Bound Method for Integer Models	128
	Extension to the Zero-One Model	138
	Adaptation of the Balas Algorithm to the Zero-One Model	141
	Summary	151
	Problems	151
Chapter 6	Nonlinear Goal Programming	155
	Nonlinear Optimization	155
	Transformation of the Nonlinear Model	156
	A Simplex Based Nonlinear Goal Programming Algorithm	162
	Pattern Search in Nonlinear Goal Programming	166
	Summary	175
	Problems	176
Chapter 7	The Priority Structure	179

	Preemptive Priorities Revisited	179
	Priority Structures in Equivalent Linear Programs	181
	Typical Difficulties in Priority Assignment	182
	Methods for Weighting and Ranking	183
	Objective Ranking	183
	Finding the Nondominated Solution Set	186
	Summary	219
Chapter 8	Applications and Areas for Further Research	193
	Introduction	193
	Curve Fitting by Goal Programming	193
	Antenna Array Design	197
	The Capital Budgeting Problem with Multiple Objectives	202
	The Multiple Objective Transportation Problem	206
	Solving Nonlinear Integer Goal Programming Models	208
	A Model for the Allocation of Western Coal Resources	212
	Summary	219
Chapter 9	Conclusions	221
	Where Do We Go from Here?	221
	Questions and Answers	221
	Future Research	224
	Summary	225
Appendix	Selected Computer Codes for Goal Programming Models	227
	Notes	249
	Index	257
	About the Author	263
