

Contents

1. Review of Some Basic Concepts and Theorems of Structural Analysis	<i>W. Prager</i>	
1.1. Static and Kinematic Variables		1
1.2. Linearly Elastic Structures		5
1.3. Rigid, Perfectly Plastic Structures		15
1.4. Elastic, Perfectly Plastic Structures		21
2. Problem Formulation and Optimality Criteria	<i>W. Prager and M. Save</i>	
2.1. Terminology		31
2.2. Problem Types		33
2.3. Elementary Problems of Structural Optimization		34
2.4. Empirical Optimality Criteria.....		35
2.5. Ill-Posed Problems		37
3. Optimal Design of Beams and Frames	<i>M. Save</i>	
3.1. Optimality Condition for Prescribed Load Factor at Plastic Collapse		41
3.2. Optimal Plastic Design for Given Collapse Load.....		48
3.3. Optimality Condition for Prescribed Elastic Compliance		73
3.4. Optimal Elastic Design for Given Compliance		76
3.5. Various Behavioral Constraints: Common Features and Optimality Conditions		80
3.6. Examples of Optimal Single-Purpose Structures for Various Behavioral Constraints		89
3.7. General Formulation of Optimality Conditions for Multipurpose Beams and Frames.....		95
3.8. Examples of Optimal Design of Multipurpose Structures.....		98
3.9. Optimization of the Layout		113

4. Optimal Design of Trusses	<i>W. Prager</i>	
4.1. Optimal Plastic Design of a Truss of Given Layout for a Single Loading		121
4.2. Optimal Layout of a Truss in Plastic Design for a Single Loading		125
4.3. Michell's Problem		128
4.4. Michell Fields		130
4.5. Use of Michell Fields		138
4.6. Optimal Design of an Elastic Truss for Given Compliance		145
4.7. Nearly Optimal Layout of Trusses with a Finite Number of Joints		147
4.8. Some Remarks on Optimal Trusses		148
4.9. Appendix		150
5. Optimal Design of Grillages	<i>W. Prager</i>	
5.1. Optimal Plastic Design of Rectangular Grillages of Orthogonal Prismatic Beams		153
5.2. Optimal Layout of a Grillage in Plastic Design for a Single Loading		159
5.3. Morley Fields		164
5.4. Matching of Morley Fields		171
5.5. Optimal Polygonal Grillages		180
5.6. Partially Discretized Grillages		197
6. Optimal Design of Plates, Shells, and Disks	<i>M. Save</i>	
6.1. Introduction		201
6.2. Circular Plates with Axisymmetric Loading		203
6.3. Other Plate Problems		237
6.4. Cylindrical Shell under Axisymmetric Loads		238
6.5. Other Shell Problems		252
6.6. Circular Disks in Plane Stress		258
6.7. Other Optimal Disk Problems		267
7. Lagrange Multiplier Methods for Optimization with Constraints	<i>G. Sacchi</i>	
7.1. Introduction		271
7.2. Beams in Bending		276
7.3. Plates in Bending		280
7.4. Optimal Segmentation and Optimal Location of Supports		284
7.5. General Discussion		288
8. Review of Some Extensions of Design Procedures	<i>M. Save</i>	
8.1. Introduction		289
8.2. Extensions to Other Structures		289
8.3. Extensions to Other Behavioral Constraints		292
8.4. Extensions to Other Cost Functions		294

Contents	xi
9. Solutions to Exercises <i>M. Sava and W. Prager</i>	297
