

Table of Contents

Introduction	vii
--------------	-----

PART I

MATRICES, BLOCK-EQUATIONS, AND DETERMINANTS

Chapter I / EQUATIONS-SYSTEMS AND TABLEAUX	3
Chapter II / MATRIX NOTATION	5
Chapter III / BLOCK-EQUATIONS AND MATRIX-INVERSION	33
Chapter IV / SOME OPERATORS AND THEIR USE	62
Chapter V / DETERMINANTS AND RANK	68

PART II

GRAPHS AND LINEAR PROGRAMMING

Chapter VI / VECTORS AND COORDINATE-SPACES	115
Chapter VII / SOME BASIC LINEAR PROGRAMMING CONCEPTS	144
Chapter VIII / OUTLINE OF THE SIMPLEX ALGORITHM	149
Chapter IX / THE SEARCH FOR A FEASIBLE SOLUTION	181
Chapter X / MIXED SYSTEMS, UPPER AND LOWER BOUNDS	205
Chapter XI / DUALITY	223
Chapter XII / LINEAR PROGRAMMING ON THE COMPUTER	242
Chapter XIII / PARAMETRIC VARIATION OF THE L.P. PROBLEM	273

N.B. Answers to exercises are not included in this list of contents, but may be found in the places indicated with the exercises, usually at the end of the chapters.

PART IIISOME GENERAL MATHEMATICAL PROGRAMMING NOTIONS AND
RELATED MATRIX ALGEBRA

Chapter XIV / TOPOLOGY OF FEASIBLE SPACE AREAS AND ITS RELATION TO DEFINITENESS	319
Chapter XV / OPTIMALITY CONDITIONS	363

PART IVQUADRATIC PROGRAMMING

Chapter XVI / QUADRATIC PROGRAMMING WITH LINEAR RESTRICTIONS	402
Chapter XVII / PARAMETRIC METHODS IN QUADRATIC PROGRAMMING	516
Chapter XVIII / GENERAL QUADRATIC PROGRAMMING	556

PART VINTEGER PROGRAMMING

Chapter XIX / INTEGER PROGRAMMING AND SOME OF ITS APPLICATIONS	637
Chapter XX / BRANCHING METHODS	656
Chapter XXI / THE USE OF CUTS	702
REFERENCES	773
INDEX	779
