

# Contents

Preface	vii
<b>Theory</b>	
Optimality Conditions and Sensitivity Analysis of Cone-constrained and Semi-definite Programs ALEXANDER SHAPIRO	1
Testing the Feasibility of Semidefinite Programs LORANT PORKOLAB and LEONID KHACHIYAN	17
Polyhedra, Spectrahedra, and Semidefinite Programming MOTAKURI V. RAMANA	27
Infinite-Dimensional Semidefinite Programming: Regularized Determinants and Self-Concordant Barriers LEONID FAYBUSOVICH	39
<b>Applications</b>	
A Tour d’Horizon on Positive Semidefinite and Euclidean Distance Matrix Completion Problems MONIQUE LAURENT	51
Semidefinite Programming and Graph Equipartition STEFAN E. KARISCH and FRANZ RENDL	77
The Totally Nonnegative Completion Problem CHARLES R. JOHNSON, BRENDA K. KROSCHEL and MICHAEL LUNDQUIST	97
The <i>Multi-SAT</i> Algorithm JUN GU	109
How efficiently can we maximize threshold pseudo-Boolean functions? M. R. EMAMY-K.	127
Faster Algorithm for Shortest Network under Given Topology GUOLIANG XUE, DING-ZHU DU and FRANK K. HWANG	137

Bayesian Heuristic Approach (BHA) and Applications to Discrete Optimization AUDRIS MOCKUS, JONAS MOCKUS and LINAS MOCKUS	153
Approximation Clustering: a Mine of Semidefinite Programming Problems BORIS MIRKIN	167
<b>Algorithms</b>	
A Long-Step Path Following Algorithm for Semidefinite Programming Problems KURT M. ANSTREICHER and MARCIA FAMPA	181
Cutting Plane Algorithms for Semidefinite Relaxations CHRISTOPH HELMBERG and ROBERT WEISMANTEL	197
Infeasible-Start Semidefinite Programming Algorithms via Self-Dual Embeddings E. DE KLERK, C. ROOS and T. TERLAKY	215
Solution of the Trust Region Problem via a Smooth Unconstrained Reformulation STEFANO LUCIDI and LAURA PALAGI	237
