

THE CONVECTION SUBPROGRAMME DESCRIPTION

Table of Contents

	<u>Page</u>
<u>PREFACE</u>	i
<u>LIST OF FIGURES</u>	v
<u>ACKNOWLEDGEMENTS</u>	vii
1. <u>INTRODUCTION</u>	1
1.1 Definition of the Convection Subprogramme and its objectives	2
1.2 Contribution to the Central Programme	2
1.3 Organization of this document	3
1.4 Definitions	4
2. <u>SCIENTIFIC BASIS AND OBJECTIVES</u>	6
2.1 Observations of scale phenomena	7
2.2 Parametric theories of cumulus interaction	12
2.3 Analyses of interactions	14
2.4 Modelling of interactions	16
3. <u>DESCRIPTION OF THE SCALE PHENOMENA: THE OBSERVATIONS</u>	19
3.1 A-scale (tropical-wave scale)	20
3.2 B-scale (cluster-scale)	22
3.3 C-scale (meso-scale)	27
3.4 D-scale (cumulus-scale)	31
4. <u>STUDY OF INTERACTIONS: THE ANALYSES</u>	37
4.1 Controls on convection	41
4.2 Feedback of convection	44
4.3 Special studies	50
5. <u>MODELLING OF INTERACTIONS: PARAMETERIZATION</u>	52
5.1 Diagnostic models	54
5.2 Prediction models	55
6. <u>DATA SUMMARY BY PLATFORM</u>	58

7.	<u>DATA MANAGEMENT</u>	69
7.1	Introduction	70
7.2	The GATE data management system	70
7.3	The functions and responsibilities of the CSDC	73
7.4	Brief description of proposed CSDC tasks	76
	<u>REFERENCES</u>	81
