<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>A first look at zeta functions and heat traces</b>	<b>9</b>
2.0	Introduction	9
2.1	Zeta functions in quantum field theory	9
2.2	Statistical mechanics of finite systems: Bose-Einstein condensation	19
2.3	Local versus global boundary conditions	20
2.4	Concluding remarks	39
<b>3</b>	<b>Zeta functions on generalized cones and related manifolds</b>	<b>41</b>
3.0	Introduction	41
3.1	Scalar field on the three-dimensional ball	42
3.2	Scalar field on the $D$ -dimensional generalized cone	50
3.3	Spinor field with global and local boundary conditions	59
3.4	Forms with absolute and relative boundary conditions	65
3.5	Oblique boundary conditions on the generalized cone	73
3.6	Further examples on a related geometry	77
3.7	Concluding remarks	85
<b>4</b>	<b>Calculation of heat kernel coefficients via special cases</b>	<b>87</b>
4.0	Introduction	87
4.1	Heat equation asymptotics for manifolds without boundary	88
4.2	General form for Dirichlet and Robin boundary conditions	92
4.3	Heat kernel coefficients on the generalized cone	101
4.4	Determination of the general heat kernel coefficients	111
4.5	Mixed boundary conditions	118
4.6	Special case calculations for mixed boundary conditions	124
4.7	Determination of the mixed heat kernel coefficients	133
4.8	Oblique boundary conditions	142
4.9	Leading heat equation asymptotics with spectral boundary conditions	155
4.10	Summary of the results	166
4.11	Further boundary conditions	174
4.12	Concluding remarks	179
<b>5</b>	<b>Heat content asymptotics</b>	<b>181</b>
5.0	Introduction	181

5.1	General form of the heat content coefficients	182
5.2	Dirichlet boundary conditions	184
5.3	Robin boundary conditions	186
5.4	Heat content asymptotics on the generalized cone	187
5.5	Mixed boundary conditions	196
5.6	Concluding remarks	197
<b>6</b>	<b>Functional determinants</b>	<b>199</b>
6.0	Introduction	199
6.1	Some one-dimensional examples	200
6.2	Scalar field	203
6.3	Spinor field with global and local boundary conditions	213
6.4	Forms with absolute and relative boundary conditions	216
6.5	Determinants by conformal transformation	219
6.6	Concluding remarks	227
<b>7</b>	<b>Casimir energies</b>	<b>229</b>
7.0	Introduction	229
7.1	Scalar field	230
7.2	Spinor field with global and local boundary conditions	235
7.3	Electromagnetic field with and without medium	237
7.4	Massive scalar field	240
7.5	Massive spinor field with local boundary conditions	246
7.6	Concluding remarks	253
<b>8</b>	<b>Ground-state energies under the influence of external fields</b>	<b>255</b>
8.0	Introduction	255
8.1	Formalism: Scattering theory and ground-state energy	256
8.2	Examples and general results	270
8.3	Spinor field in the background of a finite radius flux tube	273
8.4	Concluding remarks	286
<b>9</b>	<b>Bose-Einstein condensation of ideal Bose gases under external conditions</b>	<b>289</b>
9.0	Introduction	289
9.1	Ideal Bose gases in the grand canonical description	291
9.2	Canonical description of ideal Bose-Einstein condensates	297
9.3	Microcanonical condensate fluctuations	304
9.4	Concluding remarks	306
<b>10</b>	<b>Conclusions</b>	<b>307</b>
<b>A</b>	<b>Basic zeta functions</b>	<b>313</b>
<b>B</b>	<b>Conformal relations between geometric tensors</b>	<b>321</b>

<b>C</b>	<b>Application of index theorems</b>	<b>333</b>
<b>D</b>	<b>Representations for the asymptotic contributions</b>	<b>339</b>
<b>E</b>	<b>Perturbation theory for the logarithm of the Jost function</b>	<b>349</b>
	<b>References</b>	<b>357</b>
	<b>Index</b>	<b>377</b>
