|---|-----|
| Preface   | v   |
| 1 Exponential, Logarithmic and Hyperbolic Functions | 1   |
| 2 Complex Numbers                                   | 17  |
| 3 Differentiation and Applications                  | 31  |
| 4 Methods of Integration                            | 62  |
| 5 Applications of Integration                       | 95  |
| 6 Determinants and Matrices                         | 125 |
| 7 Vectors   | 149 |
| 8 Ordinary Differential Equations                   | 171 |
| 9 Partial Differentiation                           | 218 |
| 10 Multiple Integrals                               | 242 |
| 11 Fourier Series                                   | 256 |
| 12 Group Theory                                     | 274 |
| 13 Probability                                      | 299 |
| 14 Frequency Distributions                          | 312 |
| 15 Binomial, Poisson and Normal Distributions       | 330 |
| 16 Quality Control                                  | 352 |
| 17 Significance Tests                               | 369 |
| 18 Analysis of Variance                             | 398 |
| 19 Regression Analysis                              | 426 |
| 20 Design of Experiments                            | 448 |
| Tables  | 472 |
| Answers   | 480 |
| Index   | 491 |
