

# CONTENTS

Preface .....	vii
1. Graph Algorithms in Chemical Computation .....	1
Robert Endre Tarjan	
2. Algorithm Design in Computational Quantum Chemistry .....	21
Ernest R. Davidson	
3. Rational Selection of Algorithms for Molecular Scattering Calculations .....	52
Roy G. Gordon	
4. Molecular Dynamics and Transition State Theory: The Simulation of Infrequent Events .....	63
Charles H. Bennett	
5. Newer Computing Techniques for Molecular Structure Studies by X-Ray Crystallography .....	98
David J. Duchamp	
6. Algorithms in the Computer Handling of Chemical Information .....	122
Louis J. O'Korn	
Index .....	149
