

Table of Content

Session 1: Robustness Validation

Chairmen: E. Wolfgang, ECPE, Germany; H.-P. Feustel, Continental Automotive, Germany

- 1.1 Robustness Validation – An Improved Qualification Method for Semiconductor Devices in Automotive (Invited paper) 13**
H. Keller, ZVEI, Frankfurt/Main, International Work Group Robustness Validation, SAE-ZVEI-JSAE-AEC, Detroit, Frankfurt/Main
- 1.2 Predictive Reliability, Prognostics and Risk Assessment for Power Modules (Invited paper) 19**
C. Bailey, H. Lu, C. Yin, S. Ridout, University of Greenwich, London, United Kingdom

Session 2: Power Module Reliability

Chairmen: M. Mermet-Guyennet, Alstom, France; J. Lutz, Chemnitz University of Technology, Germany

- 2.1 Lifetime Modeling and Prediction of Power Devices (Invited paper) 27**
M. Ciappa, ETH Zürich, Switzerland
- 2.2 Model for Power Cycling lifetime of IGBT Modules – various factors influencing lifetime ... 37**
R. Bayerer, T. Licht, Infineon Technologies, Warstein; T. Herrmann, J. Lutz, M. Feller, Chemnitz University of Technology, Germany
- 2.3 Proposition of IGBT modules assembling technologies for aeronautical applications 43**
A. Zéanh, A. Bouzourene, J. Casutt, ThalesAvionics Electrical Systems, Chatou;
O. Dalverny, M. Karama, ENI de Tarbes – (LGP), Tarbes; S. Azzopardi, E. Woïrgard, Université Bordeaux, Talence, M. Mermet-Guyennet, PEARL, Alstom Transport Tarbes, Séméac, France
- 2.4 Test System for Reliability Management of Power Modules 49**
T. Wernicke, A. Middendorf, S. Dieckerhoff, H.Reichl, Technical University of Berlin,
S. Guttowski, Fraunhofer Institute for Reliability and Microintegration, Berlin, Germany
- 2.5 Power cycling induced failure mechanisms in the viewpoint of rough temperature environment 55**
J. Lutz, T. Herrmann, M. Feller, Chemnitz University of Technology; R. Bayerer, T. Licht, Infineon Technologies, Germany; R. Amro, Palestine Polytechnic University, Hebron, Palestine
- 2.6 DBC substrate based EMC Transfer Molded Power Module 59**
K. H. Lee, O.-S. Jeon, S.-W. Lim, S.-M. Park, B.-Ok Lee, T.-K. Lee, Fairchild Semiconductor, Bucheon, Korea

Session 3: EMC and Thermal Management

Chairmen: K. Ngo, CPES, U.S.A.M. Stoisiek, University Erlangen, Germany

- 3.1 Built-in EMC for Integrated Power Electronics Systems (Invited paper) 67**
J.-L. Schanen, J. Roudet, Institut National Polytechnique de Grenoble, St Martin d’Heres, France
- 3.2 EMC in Power Electronics (Invited paper) 77**
E. Hoene, Fraunhofer IZM, Berlin, Germany

- 3.3 Design and Assembly of Power semicon-ductors with double-sided water cooling 83**
M. Schneider-Ramelow, T. Baumann, E. Hoene, Fraunhofer IZM, Berlin, Germany
- 3.4 Compact thermal model for the analysis of power devices thermal interactions 91**
B. Allard, S. M'Rad, INSA-Lyon, Villeurbanne, France; X. Jordà, X. Perpinya, Centre Nacional de Microelectrònica, Barcelona, Spain
- 3.5 Thermal Power Density Barriers of Converter Systems 97**
U. Drofenik, J. W. Kolar, ETH Zurich, Switzerland

Session 4: Packaging

Chairmen: J. Daan van Wyk, South Africa; A. Hamidi, ABB, Switzerland

- 4.1 Review on Highly Integrated Solutions for Power Electronic Devices (Invited paper) 103**
J. Schulz-Harder, Electrovac Curamik GmbH, Regensburg, Germany
- 4.2 The Road to the Next Generation Power Module – 100% Solder free Design (Invited paper) 111**
U. Scheuermann, P. Beckedahl, SEMIKRON Elektronik GmbH & Co. KG, Nürnberg, Germany
- 4.3 Low-Temperature Sintering of Nanoscale Silver Paste for High-Temperature Power Chip Attachment 121**
G.-Q. Lu, J. N. Calata, T. G. Lei, Virginia Polytechnic Institute and State University, Blacksburg, USA
- 4.4 3D Integration of Power Semiconductor Devices based on Surface BumpTechnology 127**
M. Mermet-Guyennet, P. Lasserre, J. Saiz, ALSTOM Transport (PEARL), Semeac, France;
A. Castellazzi, Swiss Federal Institute of Technology (ETH Zurich), Switzerland
- 4.5 A Study of Pressed Contact Technology on IGBT Devices between –40 °C and +200 °C 133**
G. Banckaert, M. Mermet-Guyennet, ALSTOM- Transport, Power Electronics Associated Research Laboratory (PEARL), France; A. Castellazzi, Swiss Federal Institute of Technology (ETH Zurich), Switzerland

Session 5: Gate Drive and Control

Chairmen: B. Allard, INSA, France, M. Arpilliere, Schneider-Electric, France

- 5.1 An Investigation of Gate Drive Circuits and Losses in Power Devices of Multilevel Converters for Circuit Integration to Realize High Output Power Density 139**
M. Kamaga, Y. Sato, Chiba University; K. Sung, Y. Hayashi, National Institute of Advanced Industrial Science and Technology, H. Ohashi, Y. Hayashi, Ibaraki National College of Technology, Ibaraki, Japan
- 5.2 High Efficiency Isolated Half-Bridge Gate Driver with PCB Integrated Transformer 143**
S. Zeltner, Fraunhofer Institute of Integrated Systems and Device Technology, Erlangen, Germany
- 5.3 Low-cost Digital Control for SMPS Integration 149**
X. Lin-Shi, B. Allard, INSA-Lyon; France; S. Guo, Y. Gao, Shanghai University, Shanghai, China

Session 6: Passives

Chairmen: W. Sammet, EPCOS, Germany; B. Ferreira, Technical University Delft, The Netherlands

- 6.1 Optimisation of DC-link capacitors 155**
K. Kriegel, J. Otto, Siemens AG; J. Rackles, Munich University of Applied Sciences, Germany
- 6.2 Duplex pulse controlled inverter with a film capacitor DC-link 161**
A. Kleimaier, B. Hoffmann, A. Scherer, Compact Dynamics GmbH, Starnberg, Germany
- 6.3 Polymer bonded soft magnetic particles for planar inductive devices 167**
S. Egelkraut, H. Ryssel, University of Erlangen-Nuremberg, M. März, Fraunhofer Institute for Integrated Systems and Device Technology (IISB), Erlangen, Germany
- 6.4 Printed circuit board integrated multi-out-put transformer 175**
E. Waffenschmidt, Philips Research, Aachen, Germany

Session 7: Power Electronics

Chairmen: H. Schierling, Siemens, Germany; G. Busatto, University Cassino, Italy

- 7.1 DCDC Converter for Hybrid Vehicle Applications 181**
W. Schmidt, Continental Automotive Systems Division, Nürnberg, Germany
- 7.2 Modularity bridging future Power Electronics in automotive volume applications – speeding up HEV applications 185**
A. Rekofsky, R. Brey, Siemens VDO Automotive AG, Regensburg, Germany;
M. Thoben, Infineon Technologies AG, Germany; C. Mertens, Volkswagen AG, Germany;
G. Löcher, EPCOS AG, Germany
- 7.3 Automotive DC-DC Converter Designed for High Power-Density and High Efficiency 191**
M. Pavlovsky, Y. Tsuruta, A. Kawamura, Yokohama National University, Yokohama, Japan
- 7.4 Influence of Parasitic Elements on the Commutation of a Resonant Matrix Converter 197**
S. Schulz, A. Ecklebe, A. Lindemann, Otto-von-Guericke University, Magdeburg, Germany
- 7.5 System Design of Compact Low-Power Inverters for the Application in Photovoltaic AC-Modules 203**
B. Sahan, N. Henze, A. Engler, P. Zacharias, Institut für Solare Energieversorgungstechnik, ISET e.V., Kassel; T. Licht, Infineon Technologies AG, Warstein, Germany
- 7.6 Cost Reduction of PV-Inverters with SiCDMOSFETs 209**
B. Burger, D. Kranzer, O. Stalter, Fraunhofer Institute for Solar Energy Systems (ISE), Freiburg, Germany
- 7.7 Two-Stage Power Architecture for Voltage Regulator Application based on Coupled Magnetic Structure 215**
M. C. Gonzalez, P. Alou, O. García, J. A. Cobos, Universidad Politécnica de Madrid, Spain;
H. Visairo, Systems Research Center, México, Intel Corporation, Mexico
- 7.8 VHDL-AMS simulation of integrated power systems: a unified solution for multi-domain multi-level abstraction analysis 221**
A. Castellazzi, M. Ciappa, W. Fichtner, Swiss Federal Institute of Technology (ETH Zurich), Switzerland; M. Mermet-Guyennet, ALSTOM Transport (PEARL), France

Session 8: SiC and Silicon Integrated Power

Chairmen: H. Ohashi, A.I.S.T., Japan; D. Silber, University Bremen, Germany

- 8.1 Compact Power Electronics due to SiC Devices (Invited paper) 227**
P. Friedrichs, SiCED Electronics Development GmbH & Co. KG, a Siemens Company, Erlangen, Germany
- 8.2 Normally-On devices and circuits, SiC and high temperature: using SiC JFETs in power converters (Invited Paper) 237**
D. Bergogne, H. Morel, D. Tournier, B. Allard, D. Planson, C. Raynaud, M. Lazar, AMPERE INSA de Lyon, Villeurbanne, France
- 8.3 Issues and Options for Planar Packaging of High-Voltage SiC Diodes 245**
J. Xu, K.D.T. Ngo, Center for Power Electronics System (CPES), Virginia Polytechnic Institute and State University Blacksburg, USA; J. D. van Wyk, University of Johannesburg, South Africa
- 8.4 SiC JFET for high temperature power switches 253**
D. Bergogne, D. Tournier, R. Mousa, M. Shafiee Koor, D. Planson, H. Morel, B. Allard, INSA-Lyon, France
- 8.5 Current limiting with SiC JFET structures 257**
D. Tournier, D. Bergogne, A. Hamoud, D. Planson, R. Mousa, H. Morel, B. Allard, O. Brevet, INSA-Lyon, France
- 8.6 600V Converter/Inverter/Brake (CIB) Module with Integrated SOI Gate Driver IC for Medium Power Applications 261**
B. Vogler, TU Ilmenau; M. Roßberg, R. Herzer, L. Reußer, T. Wurm, SEMIKRON Elektronik GmbH & Co. KG, Nürnberg, Germany
- 8.7 Life Time Prediction and Design for Reliability of Smart Power Devices for Automotive Exterior Lighting 267**
R. Letor, S. Russo, R. Crisafulli, STMicroelectronics, Catania, Italy

Session 9: System Integration

Chairmen: D. Boroyevich, CPES, U.S.A.G. Wachutka, TU Munich, Germany

- 9.1 System Integration Using Advanced Power Semiconductors (Invited paper) 273**
G. Deboy, Infineon Technologies Austria AG, Villach, Austria
- 9.2 A High Number of Phases Enables High Frequency Techniques and a better Thermal Management in Medium Power Converters 281**
O. Garcia, P. Alou, J. A. Oliver, J. A. Cobos, Universidad Politécnica de Madrid (UPM); P. Zumel, Universidad Carlos III de Madrid, Spain
- 9.3 System Integration Approach for High Power Density Drives 285**
J. Popović Gerber, European Centre for Power Electronics (ECPE), Nuremberg; M. Gerber, J. A. Ferreira, Delft University of Technology, Delft, The Netherlands
- 9.4 An Integrated Electronic Ballast for High Intensity Discharge (HID) Lamps 291**
Y. Jiang, F. C. Lee, Y. Liang, Virginia Polytechnic Institute and State University, USA; J. D. van Wyk, University of Johannesburg, South Africa; W. Liu, International Rectifier, El Segundo, USA

- 9.5 Current Sensor Dedicated for High Temperature Integrated Power Electronics** 297
F. Grecki, W. Koczara, G. Iwanski, J. Lastowiecki, Warsaw University of Technology, Poland
- 9.6 Advanced Power Electronics Systems (Invited paper)**
H. Ohashi, Tokyo Institute of Technology, Japan
Paper is not available
- 9.7 IPEM-Based Power Electronics System Integration (Invited paper)** 303
D. Boroyevich, F. C. Lee, J. D. Van Wyk, G.-Q. Lu, E. P. Scott, M. Xu, R. Burgos, F. Wang, CPES, Virginia Tech, Blacksburg, VA, USA; T. M. Jahns, T. A. Lipo, R. D. Lorenz, University of Wisconsin-Madison, WI, USA; T. P. Chow, Rensselaer Polytechnic Institute, Troy, NY, USA

Session 10: ECPE Roadmap

Chairmen: L. Lorenz, Infineon Technologies, China, T. Harder, ECPE, Germany

- 10.1 The ECPE Roadmap Initiative** 313
T. Harder, L. Lorenz, ECPE European Center for Power Electronics e.V., Nuremberg, Germany
- 10.2 Power Electronics Technology Roadmaps – a Bottom-up Approach** 315
E. Wolfgang, T. Harder, ECPE, Nürnberg, Germany
- 10.3 Automotive Power Electronics Roadmap** 317
J. Kolar, ETH Zurich, Switzerland; M. März, Fraunhofer IISB, Germany, E. Wolfgang, Germany
- 10.4 Power Electronics Technology Roadmap: High Frequency Power Supplies (P<1kW)** 319
José A. Cobos, UPM, Spain, Cian O’Mathuna, Tyndall, Ireland
- 10.5 ECPE Power Electronics Research and Technology Roadmaps: Team No. 5: High Frequency Power Conversion > 1kW** 321
T. Reimann, ISLE GmbH, Ilmenau, Germany

Session 11: Dialog Session – Posters

Best Poster Paper Award Committee

H.-J. Schulze, Infineon Technologies, Germany; S. Azzopardi, University Bordeaux, France;
A. Consoli, University Catania, Italy; S. Jun, Siemens, China; F. Osterwald, Danfoss, Germany

- P2.7 Base Plate Shape Optimisation for High-Power IGBT Modules** 323
J.-P. Sommer, B. Michel, Fraunhofer Institute for Reliability and Micro Integration (IZM), Berlin;
R. Bayerer, R. Tschirbs, Infineon Technologies AG, Warstein, Germany
- P2.8 Non-Destructive Experimental Investigation about RBSOA in High Power IGBT Modules** 327
G. Busatto, C. Abbate, B. Abbate, F. Iannuzzo, University of Cassino, Italy
- P3.6 Extraction of Efficient Thermal Models for Life Limiting Interfaces in Power Modules** 333
M. Musallam, C. M. Johnson, University of Nottingham, United Kingdom
- P3.7 Direct Substrate Cooling of Power Electronics** 339
R. Skuriat, C. M. Johnson, The University of Nottingham, United Kingdom
- P3.8 Cooling of Insulated Assemblies** 345
S. Förster, A. Lindemann, Otto-von-Guericke University Magdeburg, Germany

P5.4	A digital control technique for high-performances DC-DC converters	351
	V. Boscaino, G. Capponi, G. M. Di Blasi, P. Livreri, Università degli Studi di Palermo; F. Marino, STMicroelectronics, Catania, Italy	
P6.5	Comparative study of three transformer concepts for high current dual active bridge converters	357
	Y. Wang, B. Roodenburg, S.W H. de Haan, Technical University Delft, The Netherlands	
P6.9	Adjustable speed generation system with axial flux permanent magnet generator	361
	W. Koczara, Warsaw University of Technology, Poland; Neil L. Brown, J. Al-Tayie, N. Al Khayat, R. Seliga, E. Ernest, A. Krasnodebski, Cummins Generator Technologies, Stamford, United Kingdom	
P6.10	EMS Analysis on Digital Pulse Width Modulators	367
	E. Orietto, G. Spiazzi, P. Mattavelli, Università di Padova; S. Saggini, Università di Udine, Italy	
P6.11	Robustness Analysis of DC Distributed Power Systems by Means of Behavioral DC-DC Converter Models	373
	J. A. Oliver, R. Prieto, L. Laguna, J. A. Cobos, Universidad Politécnica de Madrid (UPM), Spain	
P8.8	The ESBT® (Emitter-Switched Bipolar Transistor): a new monolithic power actuator technology devoted to high voltage and high frequency applications	379
	C. Ronsisvalle, V. Enea, STMicroelectronics, Catania, Italy	
P8.9	Trade-off between Energy Savings and Execution Time Applying DVS to a Microprocessor	385
	M. Vasić, O. García, P. Alou, J. A. Oliver, J. A. Cobos, Universidad de Politécnica en Madrid, Spain	
P8.10	Analysis of STI Thin-SOI LDMOS transistors for Smart Power and high frequency applications	389
	I. Cortes, P. Fernandez-Martinez, D. Flores, S. Hidalgo, J. Rebollo, Centro Nacional de Micro-electrónica, Barcelona, Spain	
P9.8	Performance Comparison of a Buck Converter Using Shielded-Substrate and Co-Packaged Planar Inductors	397
	M. H. F. Lim, D. Gilham, F. C. Lee, K. D. T. Ngo, Virginia Polytechnic Institute and State University, J. D. van Wyk, University of Johannesburg, South Africa	
P9.9	PEEC-Based Numerical Optimization of Compact Radial Position Sensors for Active Magnetic Bearings	403
	A. Müsing, C. Zingerli, P. Imoberdorf, J. W. Kolar, ETH Zürich, Switzerland	
P10.6	High Temperature and Power Electronics Systems in Automotive Applications – The Approach of the ZVEI Working Group ‘High Temperature Electronics’	409
	M. Rittner, Robert Bosch GmbH, Schwieberdingen, Germany
