

Table of contents

FOREWORD

CHAPTER I: Variational problems in plasticity theory

Introduction	p.	1
1. Function spaces	p.	3
2. Convex analysis - a review of some basic concepts and results	p.	26
3. Formulation of the variational problems of plasticity theory	p.	57
4. Duality of the variational problems	p.	73
5. Limit Analysis	p.	87
6. Relaxation of the boundary condition	p.	99

CHAPTER II: Solution of the variational problems in the finite-energy spaces

Introduction	p.	111
1. Further results on the space $LD(\Omega)$	p.	114
2. The space $BD(\Omega)$ (I)	p.	138
3. The space $BD(\Omega)$ (II)	p.	157
4. Convex functions of a measure	p.	175
5. Convex functionals of a measure	p.	196
6. Example of a convex function of a measure: relaxation of the strain problem	p.	214
7. Duality between the generalised stresses and strains	p.	224
8. Existence of solutions to the generalised strain problem	p.	254

CHAPTER III: Asymptotic problems and problems in the theory of plates

Introduction	p.	267
1. Some asymptotic problems: problems of imperfectly plastic bodies	p.	268
2. Some problems in the theory of plates	p.	293

PRINCIPAL NOTATIONS	p.	335
