*Preface*    *vii*

W. F. AMES, A. DONATO & M. C. NUCCI

Analysis of the threadline equations    **1**

A. M. ANILE & G. RUSSO

Corrugation stability of magnetohydrodynamic shock waves    **11**

N. ASANO

On conditions and determination of the Hamiltonian operator    **22**

G. BOILLAT

Wave and shock velocities in nonlinear electrodynamics    **30**

C. CERCIGNANI

A singular inverse-scattering approach to nondispersive hyperbolic systems    **34**

C. CURRO & A. DONATO

Similarity solutions and asymptotic waves    **41**

J. ENGELBRECHT

On mathematical models for nerve-pulse transmission    **54**

D. FUSCO & N. MANGANARO

Prominent features of a variable transformation for a class of quasilinear hyperbolic systems of first order    **71**

Y. KATO

Redundancy in the inverse scattering transform for the Zakharov–Shabat equation and the basis of Hirota’s bilinear form method    **83**

T. KAWAHARA & S. TOH

On some properties of solutions to a nonlinear evolution equation including long-wavelength instability    **95**

K. KONNO

Nonlinear interactions among solitons and anti-solitons in the complex  $t$ -plane for the Hirota–Ito equation    **118**

V. P. KOROBENIKOV & A. T. IL'ICHEV

On some methods of qualitative investigation of one-dimensional evolution equations in continuum mechanics **129**

T. RUGGERI

Stability and discontinuity waves for symmetric hyperbolic systems **148**

N. SUGIMOTO

'Generalized' Burgers equations and fractional calculus **162**

M. TAJIRI

Similarity solutions of soliton equations **180**

T. TANIUTI

Reductive perturbation method for quasi-one-dimensional nonlinear wave propagation **196**

M. TEYMUR

Nonlinear modulation and the fifth-harmonic resonance of Love waves on a neo-Hookean layered half-space **205**

T. YOSHINAGA, T. YAMAMOTO & T. KAKUTANI

Resonant interaction between long and short waves on a nonlinear transmission line **229**
