Contents

Preface vii

1. What Is Symmetry? 1

2. The Mathematics of Symmetry: Group Theory 5
2.1. The Group Concept 6
2.2. Mapping 19
2.3. Isomorphism 23
2.4. Equivalence Relation 27
2.5. Homomorphism 29
2.6. Subgroup 34
2.7. Summary of Chapter Two 36

3. Group Theory Continued 38
3.1. Conjugacy, Equivalence Class, Invariant Subgroup, Kernel 38
3.2. Coset Decomposition 43
3.3. Factor Group 46
3.4. Anatomy of Homomorphism 49
3.5. Generators 53
3.6. Direct Product 54
3.7. Permutations, Symmetric Groups 56
3.8. Cycles, Transpositions, Alternating Groups 60
3.9. Cayley's Theorem 63
3.10. Summary of Chapter Three 64

4. Symmetry: The Formalism 66
4.1. System, State 66
4.2. Transformations, Transformation Group 68
4.3. Transformations in Space, Time, and Space–Time 73
4.4. State Equivalence 78
4.5. Symmetry Transformations, Symmetry Group 80
4.6. Quantification of Symmetry 86
4.7. Quantum Systems 88
4.8. Summary of Chapter Four 90

5. Application of Symmetry **92**
5.1. Causal Relation 93
5.2. The Equivalence Principle 97
5.3. The Symmetry Principle 104
5.4. Minimalistic Use of the Symmetry Principle 106
5.5. Maximalistic Use of the Symmetry Principle 121
5.6. Quantum Systems 123
5.7. Summary of Chapter Five 124

6. Approximate Symmetry and Spontaneous Symmetry Breaking **126**
6.1. Approximate Symmetry 126
6.2. Spontaneous Symmetry Breaking 129
6.3. Summary of Chapter Six 133

7. Symmetry in Processes, Conservation, and Cosmic Considerations **134**
7.1. Symmetry of the Laws of Nature 134
7.2. Symmetry of Initial and Final States, the General Symmetry Evolution Principle 142
7.3. The Special Symmetry Evolution Principle and Entropy 145
7.4. Conservation 150
7.5. Cosmic Considerations 153
7.6. Summary of Chapter Seven 155

8. Symmetry: The Concept **157**
8.1. The Essence of Symmetry 157
8.2. How Is Change? 160
8.3. Symmetry of the Universe 162
8.4. Analogy as Symmetry 164
8.5. Summary of Chapter Eight 167

9. Symmetry in Science **169**
9.1. Science 169
9.2. Reduction as Symmetry 171
9.3. Observer and Observed 172
9.4. Quasi-Isolated System and Surroundings 174
9.5. Initial State and Evolution 176
9.6. Reproducibility as Symmetry 178
9.7. Predictability as Symmetry 180
9.8. Symmetry at the Foundation of Science 182
9.9. Summary of Chapter Nine 182

10. More Symmetry in Science **184**
10.1. Analogy in Science 184
10.2. Symmetry of Evolution 185
10.3. Symmetry of States 188
10.4. Summary of Chapter Ten 190

Summary of Principles **191**

Onward **193**

Bibliography **195**

Index **205**
