Introduction	ix
<b>Comments on Paper 1</b>	<b>1</b>
1. 30 Years in Mathematical Physics Proceedings of the Steklov Institute of Mathematics (American Mathematical Society, 1988), No. 3, pp. 3–28	3
<b>Comments on Papers 2–4</b>	<b>29</b>
2. Perturbation Theory for Gauge-Invariant Fields (with V. N. Popov) <i>Gauge Theory of Weak and Electromagnetic Interactions</i> , ed. C. H. Lai (World Scientific, 1981), pp. 213–233	31
3. The Feynman Integral for Singular Lagrangians <i>Theor. Math. Phys.</i> <b>1</b> , 1 (1970)	52
4. Covariant Quantization of the Gravitational Field (with V. N. Popov) <i>Sov. Phys. Usp.</i> <b>16</b> , 777 (1974)	65
<b>Comments on Paper 5</b>	<b>77</b>
5. Introduction to Functional Methods <i>Méthodes en théories des champs/Methods in Field Theory</i> — Les Houches, Session XXVIII, 1975, eds. R. Balian and J. Zinn-Justin (North-Holland, 1976), pp. 1–40	79
<b>Comments on Paper 6</b>	<b>119</b>
6. Inverse Problem of Quantum Scattering Theory. II <i>J. Sov. Math.</i> <b>5</b> , 334 (1976)	121
<b>Comments on Papers 7–10</b>	<b>185</b>
7. Quantum Completely Integrable Models in Field Theory <i>Mathematical Physics Reviews, Sec. C: Math., Phys. Rev. I</i> , ed. S. P. Novikov (Harwood, 1980), Vol. 1, pp. 107–155	187
8. The Quantum Method of the Inverse Problem and the Heisenberg XYZ Model (with L. A. Takhtadzhian) <i>Russian Math. Surveys</i> <b>34</b> , 11 (1979)	236
9. Integrable Models in (1+1)-Dimensional Quantum Field Theory <i>Développements Récents en Théorie des Champs et Mécanique Statistique/ Recent Advances in Field Theory and Statistical Mechanics</i> — Les Houches, Session XXXIX, 1982, eds. J.-B. Zuber and R. Stora (Elsevier, 1984), pp. 561–608	294

10. From Integrable Models to Conformal Field Theory via Quantum Groups  
*Integrable Systems, Quantum Groups, and Quantum Field Theories* — Proceedings of the NATO Advanced Study Institute and XXIII GIFT International Seminar on Recent Problems in Mathematical Physics, eds. L. A. Ibort and M. A. Rodríguez (Kluwer, 1993), pp. 1–24 342
- Comments on Paper 11** 367
11. The Search for Multidimensional Solitons  
Proceedings of the IV International Symposium on Nonlocal Field Theories (Nonlocal, Nonlinear, and Nonrenormalizable Field Theories), 1976 369
- Comments on Paper 12** 383
12. Hamiltonian Approach to the Theory of Anomalies  
*Recent Developments in Mathematical Physics* — Proceedings of the XXVI Int. Universitätswochen für Kernphysik Schladming, eds. H. Mitter and L. Pittner (Springer-Verlag, 1987), pp. 137–159 385
- Comments on Paper 13** 409
13. The Energy Problem in Einstein's Theory of Gravitation  
(Dedicated to the Memory of V. A. Fock)  
*Sov. Phys. Usp.* **25**, 130 (1982) 411
- Comments on Paper 14** 425
14. Lagrangian Mechanics in Invariant Form  
(with A. M. Vershik)  
*Sel. Math. Sov.* **1**, 339 (1981) 427
- Comments on Paper 15** 439
15. Einstein and Several Contemporary Tendencies in the Theory of Elementary Particles  
*Relativity, Quanta, and Cosmology in the Development of the Scientific Thought of A. Einstein (1879–1979)* (Johnson Reprint Corporation, 1979), Vol. 1, pp. 247–266 441
- Comments on Paper 16** 461
16. A Mathematician's View of the Development of Physics  
*Frontiers in Physics, High Technology and Mathematics* — Proceedings of the ICTP 25th Anniversary Conference, eds. H. A. Cerdeira and S. O. Lundqvist (World Scientific, 1990), pp. 238–246 463
