

Contents

1. Introduction	1
2. Asexual Haploid Populations	5
2.1 Selection	5
2.2 Mutation and Selection	9
2.3 Migration and Selection	13
2.4 Continuous Model with Overlapping Generations	13
2.5 Random Drift	24
2.6 Problems	25
3. Panmictic Populations	28
3.1 The Hardy-Weinberg Law	28
3.2 X-Linkage	35
3.3 Two Loci	37
3.4 Population Subdivision	40
3.5 Genotypic Frequencies in a Finite Population	40
3.6 Problems	42
4. Selection at an Autosomal Locus	47
4.1 Formulation for Multiple Alleles	47
4.2 Dynamics with Two Alleles	52
4.3 Dynamics with Multiple Alleles	56
4.4 Two Alleles with Inbreeding	63
4.5 Variable Environments	65
4.6 Intra-Family Selection	71
4.7 Maternal Inheritance	74
4.8 Meiotic Drive	75
4.9 Mutation and Selection	75
4.10 Continuous Model with Overlapping Generations	79
4.11 Density and Frequency Dependence	91
4.12 Problems	95

5. Nonrandom Mating	102
5.1 Selfing with Selection	103
5.2 Assortative Mating with Multiple Alleles and Distinguishable Genotypes	107
5.3 Assortative Mating with Two Alleles and Complete Dominance	108
5.4 Random Mating with Differential Fertility	112
5.5 Self-Incompatibility Alleles	116
5.6 Pollen and Zygote Elimination	119
5.7 Problems	125
6. Migration and Selection	128
6.1 The Island Model	128
6.2 General Analysis	132
6.3 The Levene Model	144
6.4 Two Diallelic Niches	148
6.5 Problems	151
7. X-Linkage	153
7.1 Formulation for Multiallelic Selection and Mutation	153
7.2 Selection with Two Alleles	159
7.3 Mutation-Selection Balance	162
7.4 Weak Selection	164
7.5 Problems	170
8. Two Loci	174
8.1 General Formulation for Multiple Loci	174
8.2 Analysis for Two Multiallelic Loci	176
8.3 Two Diallelic Loci	185
8.4 Continuous Model with Overlapping Generations	189
8.5 Problems	195
9. Inbreeding and Random Drift	200
9.1 The Inbreeding Coefficient	201
9.2 Calculation of the Inbreeding Coefficient from Pedigrees ..	203
9.3 Identity Relations Between Relatives	210
9.4 Phenotypic Effects of Inbreeding	219
9.5 Regular Systems of Inbreeding	222
9.6 Panmixia in Finite Populations	236
9.7 Heterozygosity under Mutation and Random Drift	242
9.8 The Inbreeding Effective Population Number	243
9.9 The Model for Random Drift of Gene Frequencies	248
9.10 Random Drift of Gene Frequencies	253

9.11 Gene-Frequency Change due to Mutation and Random Drift	257
9.12 The Island Model	259
9.13 The Variance Effective Population Number	261
9.14 Problems	267
10. Quantitative Genetics	279
10.1 The Decomposition of the Variance with Panmixia	280
10.2 The Correlation Between Relatives with Panmixia	284
10.3 The Change in Variance due to Assortative Mating	290
10.4 The Correlation Between Relatives with Assortative Mating	302
10.5 Selection	311
10.6 Mutation-Selection Balance	321
10.7 Problems	329
