

Contents

	Introduction	1
Chapter 1	Lagrangian Formalism	4
Chapter 2	Canonical Commutation Laws	8
Chapter 3	The Poincaré Group	10
	I Generalities	10
	II Translations	13
	III Rotations	15
	IV Physical Interpretation	17
	V Exercises	20
Chapter 4	Continuous Transformations	22
	I Generalities	22
	II Lie Groups	22
	III Isotopic Spin	24
	IV Gauge Groups	26
	V Exercises	29
Chapter 5	Space Reflection	31
	I Definition	31
	II Lorentz Transformation	31
	III Universal Covering Group	33
	IV Hilbert Space	35
	V Fock Space	41
	VI Exercises	47
Chapter 6	Conjugations	49
	I Definitions	49
	II Charge Conjugation	50
	III Particle–Antiparticle Conjugation	52
	IV Fock Space	57
	V <i>PC</i> Transformation	61
	VI Exercises	65

Chapter 7	Time Reflection	67
	I Definition	67
	II Lorentz Group	68
	III $SL(2, C)$ Group	69
	IV Hilbert Space	70
	V Fock Space	77
	VI Exercise	79
Chapter 8	Total Reflection	80
	I Definition	80
	II Tensors	80
	III Spinors	81
	IV Hilbert Space	81
	V Hermitian Conjugation	84
	VI TCP Theorem	84
	VII Exercises	88
Appendix	Quantization of Free Fields	89
	I Zero-spin Bosons	89
	II Photon Field	91
	III Fermion Field	93
	IV Interaction Picture	95
	 Bibliography	 97
	 Index	 99
