

CONTENTS

Foreword	vii
Preface	ix
Nonlinear Hyperbolic Systems of Conservation Laws, PETER D. LAX, Courant Institute	3
The Extant Nonlinear Mathematical Theory of Plasma Oscillations, C. L. DOLPH, University of Michigan	13
Some Considerations on Radiation Magnetogasdynamics, S. I. PAI, University of Maryland	47
The Initial Value Problem for the Navier-Stokes Equations, JAMES SERRIN, University of Minnesota	69
On the Stokes Paradox and Related Questions, ROBERT FINN, Stanford University.	99
Some Nonlinear Eigenvalue Problems, HELMUT H. SCHAEFER, Math Institut Universitaat, Germany	117
Stability and Nonlinear Character of Ordinary Differential Equations, JÜRGEN MOSER, Courant Institute.	139
Boundary Value Problems for Nonlinear Elliptic Equations in n Variables, DAVID GILBARG, Stanford University	151
I. On van der Pol's Equation with Large k ; and II. Celestial Mechanics over a Very Long Time, J. E. LITTLEWOOD, Mathematics Research Center	161
Rigidity of a Class of Closed Surfaces, LOUIS NIRENBERG Courant Institute	177
The Present State of Lyapunov's Direct Method, WOLFGANG HAHN, Technische Hochschule, Germany	195

Almost Periodic Solutions of Equations with Periodic Coefficients, M. L. CARTWRIGHT, The University of Cambridge, England.	207
On Uniqueness and Differentiability of Solutions of Ordinary Differential Equations, PHILIP HARTMAN, Johns Hopkins University	219
Some Remarks on Critical Point Theory in Hilbert Space, E. H. ROTHE, The University of Michigan	233
Elastic Stability and Post-Buckling Behavior, W. T. KOITER, Technical University, Delft, Holland	257
ABSTRACTS	
The Effects of Non-Linearity on Stable Coupled Difference Equations, Bart J. Daly	277
Multi-Stage Alternating Direction Methods, Jim Douglas, Jr., A. O. Garder, Jr., and Carl Percy.	278
Singularities in Supersonic Flows Past Bodies of Revolution, Ernst W. Schwiderski	280
Transformations and Nonlinear Partial Differential Equations, William F. Ames	282
Nonlinear Vibration Analysis of Plates and Shells, Yi-Yuan Yu	284
On Carleman's Model for the Boltzman Equation, Ignace I. Kolodner	285
Convex Superposition in Piecewise-Linear Systems, B. A. Fleishman	287
A Quantitative Analysis of a Bifurcation Process, R. K. Brayton and R. A. Willoughby	289
On the Initial-Value Problem for the Quasi-Linear Parabolic Equation, Henry Hermes.	289
Duality in Non-Linear Programming, O. L. Mangasarian.	292
A Complete Solution of the X and Y Equations of Chandrasekhar, T. W. Mullikin.	293
Analysis of a Set of Non-Linear Partial Differential Equations Arising from a Problem in Hydrodynamic Stability, Lee A. Segel	295
On a Result of Hadamard Concerning the Sign of the Precession of a Heavy Symmetrical Top, J. B. Diaz and F. T. Metcalf.	297

Steady Flows Near Critical Speed, W. T. Kyner	297
Note on an Integral Equation Occurring in Stagnation Point Flow, J. Siekmann.	298
Non-Linear Vibrations of Elastic Circular Plates Exhibiting Rectilinear Orthotropy, J. L. Nowinski	299
Apparent Resonances in Nonlinear Wave Motions, D. J. Benney .	302
On A-Priori Bounds for Solutions of Quasi-Linear Parabolic Equations, Stanley Kaplan	302
Some Quasi-Linear Singular Cauchy Problems, Robert Carroll .	303
Pointwise Bounds for Solutions to the Cauchy Problem for Non- Linear Elliptic Partial Differential Equations, George N. Trytten	306
Reduction of the Generalized Duffing Equation, E. D. Gurley and P. H. McDonald, Jr.,	307
On the Existence and Analyticity of Solutions of Regular Variational Problems, Guido Stampacchia	308
Systems of Two Second Order Elliptic Equations In The Plane, Bogdan Bojarski	309
Theory of Finite m -Valued δ -Ring and its Application to m -Valued Non-Linear Difference Equations, Makoto Itoh . .	309
An Existence Theorem for Periodic Solutions of Nonlinear Ordinary Differential Equations, H. W. Knobloch.	310
An Exact Stability Bound for Navier-Stokes Flow in a Sphere, L. E. Payne and H. F. Weinberger	311
Index.	313
