<i>Preface</i> . . . . .	iii
<b>CHAPTER 1. FORMULATION OF BOUNDARY VALUE PROBLEMS IN MATHEMATICAL PHYSICS</b> . . . . .	<b>1</b>
1. Some Concepts and Propositions Concerning the Theory of Sets, Theory of Functions, and the Theory of Operators . . . . .	1
2. Basic Equations of Mathematical Physics . . . . .	27
3. Classification of Linear (Second-Order) Differential Equations . . . . .	38
4. Formulation of Boundary Value Problems for Linear Second-Order Dif- ferential Equations . . . . .	52
<b>CHAPTER 2. GENERALIZED FUNCTIONS</b> . . . . .	<b>63</b>
5. Test and Generalized Functions . . . . .	63
6. Differentiation of Generalized Functions . . . . .	79
7. The Direct Product and Convolution of Generalized Functions . . . . .	95
8. Generalized Functions of Slow Growth (Tempered Distributions) . . . . .	113
9. Fourier Transform of Generalized Functions of Slow Growth . . . . .	121
<b>CHAPTER 3. FUNDAMENTAL SOLUTIONS AND THE CAUCHY PROBLEM</b> <b>139</b>	
10. Fundamental Solutions of Linear Differential Operators . . . . .	139
11. Retarded Potential . . . . .	157
12. The Cauchy Problem for the Wave Equation . . . . .	171
13. Wave Propagation . . . . .	178
14. The Cauchy Problem for the Equation of Heat Conduction . . . . .	193

<b>CHAPTER 4. INTEGRAL EQUATIONS . . . . .</b>	<b>201</b>
15. The Method of Successive Approximations . . . . .	202
16. Fredholm's Theorems . . . . .	217
17. Integral Equations with an Hermitian Kernel . . . . .	231
18. The Hilbert-Schmidt Theorem and its Corollaries . . . . .	237
 <b>CHAPTER 5. BOUNDARY VALUE PROBLEMS FOR ELLIPTIC EQUATIONS</b>	<b>255</b>
19. The Eigenvalue Problem . . . . .	255
20. The Sturm-Liouville Problem . . . . .	270
21. Harmonic Functions . . . . .	278
22. Newtonian Potential . . . . .	291
23. Boundary Value Problems for Laplace and Poisson Equations in Space . . . . .	307
24. The Green's Function for the Dirichlet Problem . . . . .	318
25. Spherical Functions . . . . .	333
26. Boundary Value Problems for Laplace's Equation in a Plane . . . . .	347
27. Helmholtz's Equation . . . . .	362
 <b>CHAPTER 6. THE MIXED PROBLEM . . . . .</b>	<b>373</b>
28. Fourier's Method . . . . .	373
29. The Mixed Problem for an Equation of Hyperbolic Type . . . . .	388
30. The Mixed Problem for an Equation of Parabolic Type . . . . .	404
 <b>BIBLIOGRAPHY . . . . .</b>	<b>411</b>
 <i>Index . . . . .</i>	<i>415</i>
