

CONTENTS

Introduction	Page
Changes in mathematics teaching	1
The plan and use of the book	2
Chapter One: Kinds of Mathematics Lessons	
Aims and principles	5
Kinds of mathematics lessons	7
Learning and understanding mathematics	11
Flow diagrams for problems	16
Teachers' decision-making	22
Summary	26
Activities	27
Chapter Two: Exercise Lessons	
Why we start with exercise lessons	35
Patterns of exercise lessons	36
The whole-class phase of the lessons	37
Directions of change in whole-class work	42
Observation	49
The phase of individual working	55
Self-assessment	60
Summary – exercise lessons	65
Activities	67
Chapter Three: Mathematical Discussion in the Classroom	
The teacher's view of mathematics	71
The nature of mathematical discussion	73
Problem-solving as a basis of discussion	76
Mathematical situations in use	78

Selecting effective mathematical situations	89
The analysis of problem-solving discussion	91
Summary – problem-solving situations	96
Activities	97

Chapter Four: Constructing Effective Mathematical Situations

Judging situations: specific criteria	103
Examples illustrating the use of the criteria	110
Coping with the unexpected	121
Judging situations: the objectives approach	124
Summary	131
Activities	132

Chapter Five: Leadership and Mathematical Discussion

Introduction	133
Lesson plans based on discussion	134
The leadership of the teacher	137
The procedural role	138
Procedural techniques and on-the-spot decisions	143
Summary of main procedural points and techniques	152
Lesson examples and commentaries	152
The mathematics classroom: a jungle or a knowledge factory?	161
Activities	163
