

Table of Contents

Preface	1
Asymptotic Approximation of Optimal Solutions of an Acoustic Radiation Problem: T. S. Angell, R. E. Kleinman, B. Vainberg .	5
Eddy Current Imaging of Defects in a Conductive Halfspace as an Inverse Wave Scattering Problem: Recent Algorithmic Advances: F. Brouaye, B. Duchêne, M. Lefebure, D. Lesselier, R. de Oliveira Bohbot, Ch. Rozier	17
Index Weaving and Generation of Semiseparable Solutions: G. Dassios	33
Analysis and Numerical Realization of Coupled BEM and FEM for Nonlinear Exterior Problems: M. Feistauer, G. C. Hsiao, R. E. Kleinman, R. Tezaur	47
An Inverse Scattering Problem for Periodic Structures: A. Kirsch	75
On the Spectrum of the Magnetostatic Integral Operator: R. Kreß	95
Determining Coefficients Using Multiple Input Sources: B. D. Lowe, W. Rundell	107
A Relationship Between the Electrostatic and Magnetostatic Integral Operators: E. Martensen	119
Some Application of the Mellin Transform to Asymptotics of Series: P. A. Martin	129
Acoustic Scattering in a Layered Medium: M. Petry	141
The Spectrum of the Electrostatic Integral Operator for an Ellipsoid: S. Ritter	157
The Boundary Value Problem for the Stokes Resolvent Equations in \mathbb{R}^2 : W. Varnhorn	169
