CHAPTER 1	MATHEMATICAL AND PHYSICAL SCIENCES . . . . .	1
1.1	Introduction . . . . .	1
1.2	Mathematical Science . . . . .	1
1.3	Physical Science . . . . .	4
1.4	Exercises . . . . .	5
CHAPTER 2	GRAVITY . . . . .	8
2.1	Introduction . . . . .	8
2.2	A Simple Experiment . . . . .	8
2.3	Velocity . . . . .	10
2.4	Acceleration . . . . .	12
2.5	Further Experiments . . . . .	13
2.6	A Mathematical Model . . . . .	13
2.7	Still Further Experiments . . . . .	18
2.8	Exercises . . . . .	19
CHAPTER 3	THEORETICAL PHYSICS AS A MATHEMATICAL SCIENCE . . . . .	21
3.1	Introduction . . . . .	21
3.2	Basic Mathematical Concepts . . . . .	21
3.3	Basic Physical Concepts . . . . .	27
3.4	Remarks . . . . .	31
3.5	Exercises . . . . .	31
CHAPTER 4	THE PENDULUM AND OTHER OSCILLATORS . . . . .	36
4.1	Introduction . . . . .	36
4.2	A Theoretical Pendulum . . . . .	36
4.3	The Harmonic Oscillator . . . . .	40
4.4	Harmonic Motion . . . . .	44
4.5	Remarks . . . . .	48
4.6	Exercises . . . . .	48
CHAPTER 5	WAVES . . . . .	50
5.1	Introduction . . . . .	50
5.2	The Discrete String . . . . .	50
5.3	Examples . . . . .	53
5.4	Exercises . . . . .	57
CHAPTER 6	VECTORS . . . . .	59
6.1	Introduction . . . . .	59
6.2	Two-Dimensional Vectors . . . . .	59
6.3	Three-Dimensional Vectors . . . . .	61
6.4	Exercises . . . . .	66

CHAPTER 7	GRAVITATION . . . . .	69
7.1	Introduction . . . . .	69
7.2	The $1/r^2$ Law . . . . .	69
7.3	Gravitation . . . . .	71
7.4	Basic Planar Concepts . . . . .	73
7.5	Planetary Motion and Discrete Gravitation . . . . .	75
7.6	Newton's Method of Iteration . . . . .	77
7.7	An Orbit Example . . . . .	82
7.8	Gravity Revisited . . . . .	84
7.9	Attraction and Repulsion . . . . .	87
7.10	Remarks . . . . .	89
7.11	Exercises . . . . .	89
CHAPTER 8	THE THREE-BODY PROBLEM . . . . .	92
8.1	Introduction . . . . .	92
8.2	The Equations of Motion . . . . .	92
8.3	Conservation of Energy . . . . .	94
8.4	Solution of the Discrete Three-Body Problem . . . . .	95
8.5	The Oscillatory Nature of Planetary Perihelion Motion . . . . .	97
8.6	Center of Gravity . . . . .	101
8.7	Conservation of Linear Momentum . . . . .	103
8.8	Conservation of Angular Momentum . . . . .	103
8.9	Exercises . . . . .	107
CHAPTER 9	THE n-BODY PROBLEM . . . . .	109
9.1	Introduction . . . . .	109
9.2	Discrete n-Body Interaction . . . . .	109
9.3	The Solid State Building Block . . . . .	110
9.4	Flow of Heat in a Bar . . . . .	112
9.5	Oscillation of an Elastic Bar . . . . .	114
9.6	Exercises . . . . .	117
CHAPTER 10	DISCRETE FLUID MODELS . . . . .	118
10.1	Introduction . . . . .	118
10.2	Laminar and Turbulent Flows . . . . .	118
10.3	Shock Waves . . . . .	123
10.4	Exercises . . . . .	127
CHAPTER 11	SPINNING TOPS AND SKATERS . . . . .	129
11.1	Introduction . . . . .	129
11.2	The Spinning Top . . . . .	129
11.3	Angular Velocity . . . . .	130
11.4	The Spinning Skater . . . . .	132
11.5	Exercises . . . . .	136
CHAPTER 12	THE GALILEAN PRINCIPLE OF RELATIVITY . . . . .	138
12.1	Introduction . . . . .	138
12.2	The Galilean Principle . . . . .	138
12.3	Remarks . . . . .	140
12.4	Exercises . . . . .	140
APPENDIX A	FORTRAN PROGRAM FOR THE HARMONIC OSCILLATOR EXAMPLE OF SECTION 4.4 . . . . .	142
APPENDIX B	FORTRAN PROGRAM FOR THE WAVE INTERACTION EXAMPLE OF SECTION 5.3 . . . . .	143
APPENDIX C	FORTRAN PROGRAM FOR THE ORBIT CALCULATION OF SECTION 7.7 . . . . .	145
APPENDIX D	FORTRAN PROGRAM FOR THREE-BODY PROBLEM OF SECTION 8.2 . . . . .	147
APPENDIX E	FORTRAN PROGRAM FOR GENERAL n-BODY INTERACTION . . . . .	151
ANSWERS TO	SELECTED EXERCISES . . . . .	157
REFERENCES	AND SOURCES FOR FURTHER READING . . . . .	165
INDEX	. . . . .	167
