Foreword	xvii
Preface	xix
Acknowledgments	xxi
About the Author	xxiii
SECTION I GETTING STARTED	1
Chapter 1 Overview	3
1.1 Not Plastics, but Wireless	3
1.2 MIDP, the Heart and Soul of Mobile Java Technology	4
1.3 The First Umbrella: JTWI	5
1.4 A Bigger Umbrella: MSA	6
1.5 Understanding MSA APIs	7
1.5.1 Basic MIDP Platform	7
1.5.2 Advanced Networking	7
1.5.3 Multimedia	8
1.5.4 Advanced Graphics	8
1.5.5 Security and Transactions	8
1.5.6 Location	8
1.5.7 Advanced Application Invocation	9
1.5.8 Advanced Application Services	9
1.6 Looking beyond MSA 1.0	9
1.7 What about JavaFX Mobile?	10
1.8 Summary	10

Chapter 2	Tools	11
2.1	Sun Java Wireless Toolkit for CLDC: A Toaster Oven	11
2.2	NetBeans Mobility Pack: A Gourmet Kitchen	13
2.3	Eclipse, Too	13
2.4	Inside a MIDlet Suite	14
2.5	Building a MIDlet Suite	15
2.6	The Command Line: A Campfire	16
2.7	Preprocessors	17
2.8	Obfuscators	17
2.9	Emulators	18
2.10	Device Testing	18
2.11	Summary	19
Chapter 3	Quick Start	21
3.1	Make Something That Runs	21
3.2	Put Something on the Screen	22
3.3	Give the User Something to Do	23
3.4	Get the Source Code Online	25
3.5	Summary	26
Chapter 4	Core APIs	27
4.1	JVM Features You Might Miss	28
4.2	Strings, Primitive Types, and System Methods	28
4.3	Threads	29
4.4	Using Streams for Input and Output	30
	4.4.1 Be Clean	30
	4.4.2 Reading Input Data Completely	31
4.5	Dates, Collections, and Random Numbers	32
4.6	Summary	33
SECTION II	THE LIVES OF MIDLETS	35
Chapter 5	The MIDlet Habitat	37
5.1	The MIDlet Life Cycle	37
	5.1.1 AMS, the MIDlet Puppeteer	37
	5.1.2 What about That unconditional Argument?	39
	5.1.3 MIDlets Can Control Their Destinies	39
5.2	Using the Browser and Making Calls	40
5.3	Application Properties	40

5.4	Protection Domains and Signed MIDlet Suites	41
5.5	Permissions	42
5.6	The Bottom Line on MIDlet Signing	44
5.7	Summary	45
Chapter 6	Starting MIDlets Automatically	47
6.1	Responding to Network Connections	47
6.1.1	Dynamic Registration	48
6.1.2	Static Registration	48
6.1.3	Finding Incoming Connections	49
6.1.4	A Push Registry Example	49
6.2	Running a MIDlet at a Specific Time	54
6.3	Responding to Content	56
6.3.1	Invoking a Content Handler	57
6.3.2	Writing a Content Handler MIDlet	59
6.3.3	Putting It All Together	64
6.3.4	Static Content Handler Registration	65
6.4	Summary	66
SECTION III	USER INTERFACE	67
Chapter 7	Basic User Interface	69
7.1	How to Show Screens	70
7.2	TextBox, the Runt of the Litter	71
7.3	Input Modes	72
7.4	Using Alerts for Notifications	73
7.5	A Very Quick Introduction to Images	74
7.6	Putting It Together	74
7.7	Good for the Old Ticker	76
7.8	The Whole Story on Commands	76
7.9	Command Placement	79
7.10	Summary	80
Chapter 8	More User Interface	81
8.1	Lists	81
8.2	List Selections	83
8.3	Handling List Events	83
8.4	Three Lists in One Example	84
8.5	Advanced List Control	86

8.6	Using Forms	86
8.7	Working with Items	88
8.8	Gauges	89
8.9	Controlling Item Layout	90
8.10	Please Drink Form Responsibly	92
8.11	Item Change Events and Item Commands	95
8.12	Summary	98

SECTION IV GRAPHICS 99

Chapter 9 Creating Custom Screens 101

9.1	Getting Information about the Display	101
9.2	How Painting Works	102
9.3	Making Colors	102
9.4	Drawing Lines and Shapes	105
9.5	Drawing Text	109
9.6	Measuring Text	111
9.7	Creating Images	114
9.8	Drawing Images	116
9.9	Keeping Resources Small	118
9.10	Drawing on Images	119
9.11	Getting Your Fingers on the Bits	121
9.12	Clipping	124
9.13	Event Handling	124
9.14	Controlling Command Placement	127
9.15	Summary	129

Chapter 10 Custom Items 131

10.1	Custom Item Sizing	131
10.2	Painting	132
10.3	A Pretty Wait Indicator	132
10.4	Handling Events in Custom Items	135
10.5	Internal Traversal	136
10.6	An Interactive Example	137
10.7	Summary	142

Chapter 11 Using the Game API 143

11.1	Tight Looping with GameCanvas	143
11.2	Building Scenes with Layers	148
11.3	Tiled Layers	149

11.4	Sprites	151
11.5	Detecting Collisions	153
11.6	Assembling a Game Scene	153
11.7	A Blocky Example	154
11.8	Summary	158
Chapter 12	Scalable Vector Graphics	159
12.1	The Simplest Way to Show SVG Content	160
12.2	Working with Animated Documents	163
12.3	Digging into an SVG Document	166
12.4	Displaying an SVG Document on Your Own Canvas	168
12.5	Creating New SVG Elements	171
12.6	SVG Event Handling	174
12.7	Summary	178
Chapter 13	3D Graphics	179
13.1	Creating M3G Files	179
13.2	Displaying 3D Content the Easy Way	180
13.3	Doing It the Hard Way	184
13.4	Summary	192
SECTION V	STORAGE AND RESOURCES	193
Chapter 14	Record Stores	195
14.1	Itsy Bitsy Teenie Weenie Databases	196
14.2	Working with Record Stores	196
14.3	Manipulating Records	198
14.4	Making Queries	199
14.5	Iterating through Records	199
14.6	A Place to Keep Your Stuff	200
14.7	Summary	204
Chapter 15	Reading and Writing Files	205
15.1	The Quick Story	205
15.2	Working with Files and Directories	206
15.3	Somewhere, a Place for Us	208
15.4	Finding Pictures, Music, and Other Goodies	208
15.5	Starting from the Top	209
15.6	Ask for Permission	209

15.7 An Example	210
15.8 Summary	213

Chapter 16 Contacts and Calendars 215

16.1 Understanding the PIM API	215
16.2 Working with Lists	217
16.2.1 Item Queries	217
16.2.2 String Array Fields	218
16.2.3 Labels	219
16.2.4 Categories	219
16.2.5 Special Methods for Contact Lists	219
16.2.6 Special Methods for Calendars and Appointments	220
16.2.7 Special Methods for To-Do Lists	220
16.3 Where Do Lists Come From?	220
16.4 Importing and Exporting	221
16.5 What's Supported?	222
16.6 Don't Forget Permissions	222
16.7 Example	223
16.8 Summary	232

Chapter 17 Mobile Internationalization 233

17.1 About Locales	233
17.2 Using Resources	234
17.3 Finding Resources	235
17.4 Resource Inheritance	237
17.5 Formatting Numbers and Dates	237
17.6 Sorting Strings	239
17.7 Take It Out for a Spin	239
17.8 Summary	244

SECTION VI NETWORKING 245

Chapter 18 The Generic Connection Framework 247

18.1 Making Connections	247
18.2 Clean Up	249
18.3 Use Threads	250
18.4 Image Loading via HTTP	250
18.5 Advanced HTTP Techniques	252
18.6 Tips for Success	253
18.7 Using HTTPS	254

18.8	Other Connection Types	257
18.9	Incoming Connections	260
18.10	Connection Permissions	261
18.11	Summary	261
Chapter 19	Text and Multimedia Messaging	263
19.1	Why Messaging?	263
19.2	Sending Messages	264
19.3	Sending Binary Messages	265
19.4	Sending Multipart Messages	266
19.5	Receiving Messages	268
19.6	A Simple Messaging Application	269
19.7	Summary	273
Chapter 20	Bluetooth and OBEX	275
20.1	Control Your Own Bluetoothiness	276
20.2	Finding Other Bluetooth Devices and Services	276
20.3	Cheap Shots	278
20.4	Making a Client Connection	278
20.5	Setting Up a Server	279
20.6	Authorization and Encryption	280
20.7	What about OBEX?	280
20.8	Don't Forget the Push Registry	282
20.9	Permissions for Bluetooth and OBEX	282
20.10	The BlueChew Application	283
20.11	Summary	293
Chapter 21	XML and Web Services	295
21.1	Parsing XML	296
21.2	Creating a Handler	296
21.3	Parsing RSS	298
21.4	Parsing XML without JSR 172	301
21.5	Using WS-* Web Services	303
21.6	Harness the World	307
21.7	A Mobile Client for Flickr	308
21.8	Summary	317
Chapter 22	Session Initiation Protocol	319
22.1	Understanding SIP	320
22.2	Development Tools	321

22.3	Setting Up a Notifier	321
22.4	Sending Requests	321
22.5	Receiving SIP Requests and Sending Responses	322
22.6	GoSIP and SIPDemo	323
22.7	Summary	324

SECTION VII MULTIMEDIA 325

Chapter 23 Playing and Recording Sound and Video 327

23.1	Boring Background Information	327
23.2	Tones	329
23.3	Using Players	329
23.4	Supported Content Types	331
23.5	Threading and Listening	332
23.6	Taking Control	332
23.7	Playing Sampled Audio Content	333
23.8	Playing Video Content	333
23.9	The Tone Sequence Player	335
23.10	The Interactive MIDI Player	336
23.11	Recording Audio	337
23.12	Capturing Video	338
23.13	You Can't Make Everyone Happy	338
23.14	About MMMIDlet	339
23.15	Summary	340

Chapter 24 Advanced Multimedia 341

24.1	Image Processing	342
24.2	Controlling Image Format	344
24.3	Music	345
24.4	3D Audio	345
24.5	Audio Special Effects	347
24.6	More Camera Control	347
24.7	Plain Old Radio	348
24.8	Summary	349

SECTION VIII SECURITY AND TRANSACTIONS 351

Chapter 25 Smart Cards and Cryptography 353

25.1	Smart Cards? Really?	354
25.2	Testing SATSA Applications with the Emulator	354

25.3	Basic Smart Card Communication	355
25.4	Smart Card Communication with Java Card RMI	355
25.5	Generating Signatures	356
25.6	Managing Certificates	357
25.7	Cryptography	357
25.7.1	Using Message Digests	357
25.7.2	Using Signatures	358
25.7.3	Using Ciphers	359
25.8	Summary	359
Chapter 26	Mobile Payments	361
26.1	Show Me the Money!	362
26.2	Matching Applications to Payment Providers	364
26.3	Editing Payment Provisioning Information	365
26.4	Security and Payments	366
26.5	Summary	366
Chapter 27	Know Where You Are	369
27.1	The Short Story	370
27.2	An Even Shorter Story	371
27.3	Receiving Periodic Location Updates	371
27.4	Getting Close	371
27.5	Landmark Databases	372
27.6	Orientation	373
27.7	Simulating Device Location	373
27.8	Summary	374
Chapter 28	Application Architecture	375
28.1	Use the Strengths of Java ME	375
28.2	Use the Strengths of the Internet	376
28.3	Don't Cram the Desktop into a DJava ME Application	376
28.4	Developing for Multiple Devices	377
28.5	Stretchy Screens	377
28.6	Make It Just Work	378
28.7	Summary	379
Index		381
